The bag shall have a minimal thickness of 0 003 inch
The bag shall have the following properties and requirements

Property	Requirement
Impact resistance	Not less than 165 g
Tearing resistance,	
Parallel to the seal	Not less than 480 g
Perpendicular to the seal	Not less than 480 g
Liquid waste load capacity,	
Sizes 1, 4 and 5	75 pounds
Size 2	20 pounds
Size 3	40 pounds

The bag shall not be ripped, torn, or otherwise unusable.
The bag shall be clean and free of external contamination
Each package of bags shall be supplied with enough bands for closure of each bag

The bag shall be tested using the following ASTM standards

Property	Test
Impact resistance	ASTM D 1709
Tearing resistance	ASTM D 1922

Workmanship. The biohazard disposal bag shall be free from defects which detract from its appearance or impair its serviceability

Unit Package (PG) Size 1 and 4 One package containing one hundred size 1 or size 4 bags constitutes one unit

Package (PG) Size 2. One package containing two hundred and fifty size 2 bags constitutes one unit

Package (PG) Size 3. One package containing two hundred size 3 bags constitutes one unit

Package (PG) Size 5. One package containing seventy-five size 5 bags constitutes one unit

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105, with an AQL of 1.0 (percent defective) and an inspection level of II. The unit of product for examination purposes shall be one biohazard disposal bag.

Sampling for tests. Sampling for tests, including dimensional test, shall be conducted in accordance with MIL-STD-105, with an AQL of 2.5 (percent defective) and an inspection level of S-1. The unit of product for test purposes shall be two biohazard disposal bag.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable

The contracting officer has the option of accepting or rejecting the product

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical
