COMMERCIAL ITEM DESCRIPTION

PADS, DESK

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification UU-P-16.

Salient characteristics.

The pads shall consist of a wearing surface with a backing material. The smoothness of the wearing surface shall be comparable to desk top linoleum. The exposed side of the backing material shall have anti-skid qualities, but shall not cause a permanent type bond between pad and desk.

Pads shall be size I, 17-19 inches by 23-24 inches; size II, 20 inches by 34 inches; or size III, 24 inches by 38 inches. The dimensions (length and width) are allowed a tolerance of ± 1/4 inch. The overall thickness for each size shall be .080 (± 5 percent) inch and the thickness of the wearing surface shall be .050 (± 5 percent) inch.

The color of the pads shall be style A - black, or style B - brown.

The residual indentation shall not exceed 12 percent when a 50 pound load is applied to felt-backed pads nor when a 80 pound load is applied to burlap-backed pads. The indenting cylinder shall be .250 inch diameter and time of application shall be 15 minutes.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The pads shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.
