COMMERCIAL ITEM DESCRIPTION

FILE, WORK ORGANIZER, BOOK

The General Services Administration has authorized the use of this commercial item description in lieu of Interim Federal Specification UU-F-00370.

This commercial item description covers book type work organizer files which are used for filing and storing papers.

Salient characteristics:

Book type work organizer files shall come in two sizes and styles as described in table I below.

The file shall open like a book, having partitions analogous to pages.

The partition material shall have a minimum thickness of 0.0085 inch and meet the requirements specified in table II.

The gusset shall be securely bonded using a durable adhesive.

The top and bottom of the gusset shall be reinforced by coated woven tape or latex impregnated fiber.

The cover and back of the file shall be flexible vinyl or artificial leather and shall not crack or tear with typical use or age.

The minimum thickness of the cover and back shall be 0.018 inch each.

Workmanship. Book type work organizer files shall be clean and free of dirt or grease spots, holes, tears, wrinkles, and any other defects which affect appearance or serviceability.

TABLE I. Sizes and styles

Letter size	9-7/16 X 11-7/16 inch minimum
Legal size	9-7/16 X 14-7/16 inch minimum
Style A	Not less than 20 tabbed partitions indexed from A to Z. Expansible to not less than 20 inches.
Style B	Not less than 31 tabbed partitions indexed from 1 to 31. Expansible to not less than 30 inches.

TABLE II. Material requirements (minimum)

Property	TAPPI test method	Requirement
Basis weight (24 X 36-550)	T 410	142 lb
Bursting strength	T 807	90 psi
Tear resistance	T 414	
Machine direction		190 g
Cross machine direction		290 g
Folding endurance	T 423	
Machine direction		400
Cross machine direction		200

The issue of TAPPI Test Methods T 410, T 807, T 414, and T 423 in effect on the date of solicitation shall be used to determine compliance with stated requirements.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable

Packaging, packing, and marking. The files shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that will assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification. Unit and intermediate packages, as applicable, shall be marked in accordance with normal commercial practice. Shipping containers shall be marked as specified in the contract or order.

TAPPI standards are available from the Technical Association of the Paper and Pulp Industry, One Dunwoody Park, Atlanta, GA 30341.
