COMMERCIAL ITEM DESCRIPTION

PITCHERS, WATER

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification RR-P-386.

This commercial item description covers water pitchers for institutional and domestic use.

Salient characteristics:

Pitchers covered by this commercial item description shall have the following capacities and features.

Size 1, Style A - 1 quart, without cover
Style B - 1 quart, with hinged cover and ice guard
Size 2, Style A - 2 quart, without cover
Style B - 2 quart, with removable cover
Size 3 - 3 quart, without cover
Size 4 - 5 quart, without cover

The body of the pitcher shall be formed without seams from single piece of stainless steel. Sizes, 1, 2 and 3 shall have a minimum bottom thickness 0.021 inches. Size 4 shall have a minimum bottom thickness of 0.034 inches. When the pitchers are constructed without a bead, the minimum bottom thickness shall be 0.034 inches for all sizes.

The pitchers shall have a pouring spout and a stainless steel handle.

Both removable and hinged cover and the ice guard cover shall be fabriciated from stainless steel.

Workmanship. There shall be no defects which may affect serviceability, durability or appearance.

Must have National Sanitation Foundation (NSF) approval or certification by an independent testing laboratory acceptable to the GSA indicating that the same model that is being furnished under this description has been inspected and tested and conforms to NSF Standard No. 2.

The issue of the NSF Standard in effect on the date of the solicitation shall be used to determine compliance with stated requirements.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

NSF Standards are available from National Sanitation Foundation, P.O. Box 1468, Ann Arbor, Michigan 48106.
