COMMERCIAL ITEM DESCRIPTION

PASSENGER BIAS PLY TIRES, PNEUMATIC VEHICULAR (HIGHWAY)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification ZZ-T-331.

This commercial item description covers new bias ply, tubeless, pneumatic passenger tires with retreadable casings for use on passenger cars, station wagons, and similar vehicles normally operated on public roads and highways. The tires shall be of standard commercial design and warranty.

Salient characteristics:

All tires supplied shall meet as a minimum the following tire quality grading as shown in the Uniform Tire Quality Grading (UTQG), Part 575 - Consumer Information Regulation, issued by the National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

Tread wear - See Note
Traction - A or B
Temperature - A, B, or C

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

Note. To evaluate responses to invitation for bids, any percent for tread wear shall be acceptable. Bid respondents shall be evaluated by using the tread wear percentage and the cost of the tire (as weight factors) to determine the successful bidder.

Copies of the Department of Transportation, Consumer Information Regulations are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.
