COMMERCIAL ITEM DESCRIPTION

BOTTLE, APPLICATOR

The General Services Administration has authorized the use of this commercial item description, in lieu of Purchase Description 8125-00-488-7952.

Salient characteristics.

Applicator bottles, covered by this decription, shall be commercially available, reusable, of 16 fluid ounce capacity with a removable plastic trigger-type cap, with adjustable sprayer nozzle and flexible plastic tube. The tube shall be attached to the inside of the cap and shall have a strainer attached to the other end of the tube, which shall extend to the bottom of the bottle when the cap is screwed in place. The bottle shall be made of translucent high density industrial grade 28 to 30 gram polyethylene. Each bottle shall be marked with one or two ounce graduations up to at least 12 ounces. The markings shall be clearly legible and permanent. Graduation rings shall be an acceptable alternate to printed marking. Each bottle and sprayer shall be supplied as a completely assembled unit.

Workmanship. The bottles shall be free of any imperfections which will effect their servicability and appearance.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.
