FOREWORD

1. This military handbook is approved for use by all Departments and Agencies of the Department of Defense.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Supply Center Columbus, ATTN: DSCC-VAC, 3990 E. Broad St., Columbus, OH 43216 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

3. The proliferation of industry prepared drawings for the same part used in a variety of military applications has become an ever increasing item of expense to the DoD. Numerous situations have arisen where one military acquisition document would be more appropriate and cost effective than the multiplicity of contractor prepared drawings. Standard Microcircuit Drawings (SMDs) are being prepared to eliminate the need for the multitude of contractor prepared drawings for the same device when the minimum requirements of SMD's are sufficient to meet the requirements of the application on an interim or permanent basis.

1. SCOPE

1.1 Purpose. The Standard Microcircuit Drawing Program (SMDP) is directly under the auspices of the DoD Parts Control Program (PCP) as described and reinforced by DODI 4120.19. Contractually, the PCP is implemented by MIL-HDBK-965, "Parts Control Program." The PCP, whether imposed by MIL-HDBK-965 or via some other contractual means, will be the avenue for screening candidate parts for the SMDP by the DSCC Military Parts Control Advisory Group (MPCAG).

1.2 Intended use. This list has been prepared for use by or for the Government in the acquisition of products covered by SMDs. Listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. This list is subject to change without notice; revision or amendment of this list will be issued as necessary. This listing supersedes the approved source of supply listing in the individual Standard Microcircuit Drawings, however the listing of a product does not release the supplier from compliance with the SMD requirements.

1.3 Part or Identifying number (PIN). The PIN's listed in section 1, part I, are composed of the elements shown in the following example (see 1.3.2 for one part - one part number differentiation):

One part - one part number PIN

5962-90123	01	M	X	X
Drawing number (1.3.1)	Device Type	Device Class Designator (1.3.2)	Case Outline (1.3.3)	Lead Finish (1.3.3)

Non - one part - one part number PIN

86030 or 5962-88668	01	X	X
Drawing number	Device type	Case outline (1.3.3)	Lead finish (1.3.3)

1.3.1 Drawing number. One part - one part number SMD's for device classes Q, V, H, and K may cover custom device products which are generally used to specify application specific integrated circuits (both monolithic and hybrid). To differentiate between one part - one part number SMD's that cover standard product from custom product a single alpha character will be placed in the unique 3 digit portion of the SMD drawing number as in the following example: 5962-90A23. This will be the only change to the SMD PIN for custom products.

1.3.2 Device class designator. One part - one part number SMD's (fully implemented after SMD 5962-90659) contain device requirements for all three of the major military microcircuit requirements documents. By establishing a one part number system covering all three documents, the OEM can acquire to the highest level available for a given generic device to meet system needs without modifying the original contract parts selection criteria.

Military documentation format	Example PIN	Manufacturing source listing	Document listing
New MIL-PRF-38535 Standard Microcircuit Drawings	5962-XXXXXZZ(Q or V)YY	QML-38535	MIL-HDBK-103
New MIL-PRF-38534 Standard Microcircuit Drawings	5962-XXXXXZZ(H or K)YY	QML-38534	MIL-HDBK-103
New 1.2.1 of MIL-STD-883 Standard Microcircuit Drawings	5962-XXXXXZZ(M)YY	MIL-HDBK-103	MIL-HDBK-103

1.3.3 Case outline/lead finish. Case outline and lead finish are as described in each SMD.

1.3.4 Substitutability. Device-class-Q devices will replace device-class-M devices.

2. REQUIREMENTS

2.1 Drawing requirements. SMD's will be prepared in accordance with MIL-STD-100 and DOD directives.

2.2 Preparation procedures. The procedures for the generation of an SMD are provided in MIL-HDBK-780.

2.3 Drawing effectivity and duration. SMD's and device class M one part - one part number SMDs which have become inactive for new design are reflected in section 1, part 1 of the appendix of this document with an "I" in the status column.

2.4 Approved sources of supply. The approved sources of supply list in this handbook supersedes the approved sources formerly listed in each individual SMD/DSCC Drawing. This handbook is the official list of approved sources of supply for non-one part - one part number SMD PIN's and for device class M one part - one part number SMD PIN's. Device classes B, S, Q, V, H, and K one part - one part number SMD PIN's are listed for the convenience of the users. Official listing for B, S, Q, V, H, AND K levels are available in the applicable QML. Manufacturers should notify DSCC-VA in writing if they no longer wish to be listed as an approved source of supply for any device listed herein. This letter will be used by DSCC to remove the manufacturer from MIL-HDBK-103 for those devices that the manufacturer specifies that he will no longer supply.

2.5 Radiation hardness assurance (RHA) levels. SMD'S Which have RHA requirements will be indicated in section 1, part 1 of the appendix of this document with the appropriate RHA level M, D, L, R, F, G, or H replacing the dash (-) in the Drawing PIN. The actual highest RHA level (per MIL-PRF-38534 or MIL-PRF-38535) available for the listed devices will be reflected in the Drawing PINcolumn in section 1, part 1 of the appendix of this document as in
the following example:

5962(M, D, L, R, F, G, or H)8999901EA

2.6 Electrostatic discharge sensitivity (ESD) listing. ESD classification levels, as required by MIL-PRF-38534 or MIL-PRF-38535, will be listed in the status column of section 1, part 1, of the appendix. Manufacturers are required to send these classification levels to DSCC-VA for all Standard Microcircuit Drawings for which they are an approved source. The ESD listing in section 1, part 1 of the appendix will be in accordance with the following:

STATUS	INTERPRETATION
Blank	Data not submitted to DSCC
0	Not tested
1	Class 1; 0 - 1999V
2	Class 2; 2000V - 3999V
3	Class 3; >= 4000V
I	Inactive for new design

3. CONFIGURATION MANAGEMENT

3.1 Configuration management of SMDs. All proposed changes to existing SMDs will be coordinated with the military activities and industry users of record for the individual documents. This coordination will be accomplished in accordance with MIL-STD-973 using DD Form 1693, Engineering Change Proposal (Short Form).

3.2 Record of users. Industrial users should inform Defense Supply Center Columbus when a system application requires use of the SMD. When notified, DSCC will maintain a record of users and this list will be used for coordination and distribution of changes to the drawings. Users of drawings covering microelectronic devices (FSC 5962) should contact DSCC-VAC, telephone (614) 692-0544.

4. DISTRIBUTION AND REQUESTS

4.1 Distribution. Requests for individual drawings and revisions to existing drawings may be addressed to:

Defense Supply Center Columbus
ATTN: DSCC-VAC
3990 E. Broad Street
Columbus, OH 43216
Autovon 850-0674
Commercial (614) 692-0674

4.1.1 Automatic distribution. To be added to a mailing list for automatic distribution of new drawings and revisions to existing drawings requests may be addressed to:

Defense Supply Center Columbus
ATTN: DSCC-VAC
3990 E. Broad Street
Columbus, OH 43216
Autovon 850-0535
Commercial (614) 692-0535

4.1.2 Electronic distribution. Electronic copies of Standard Microcircuit Drawings are available on the World Wide Web at http://www.dscc.dla.mil.

4.2 Requests. Requests for copies of this military handbook may be addressed to:

Notes:

1/ The lead finish shown for each PIN representing a hermetic package is the most readily available from the manufacturer listed for that part. If the desired lead finish is not listed, contact the vendor to determine its availability.

2/ Where a date is shown in this column, the approved source of supply listed for this PIN has issued an End-Of-Life notice for this product. According to this notice, last-time buys will be honored on or before the date shown.

3/ Where a "Y" appears in this column, one of the following applies:

a. The approved source listed has informed DSCC that the SMD part, designated by an SMD PIN with either a device class "M" identifier or without a device class identifier, is currently being processed on a DSCC approved QML flow, as allowed by paragraph 1.2 of MIL-STD-883. By maintaining the same PIN, the manufacturer listed as an approved source has certified that no changes affecting form, fit or function, as defined by MIL-STD-973, Configuration Management, have occurred for the device.

b. The approved source is processing the SMD on a DSCC approved QML flow in accordance with MIL-PRF-38535, for those designated by an SMD PIN with device class "Q" or "V" identifiers, or in accordance with MIL-PRF-38534, for those designated by an SMD PIN with device class "H" or "K" identifiers.

4/ Vendor similar PIN's that include "(GEN)*" are not valid part numbers. These are generic numbers, provided as references for those SMD parts that no longer have approved sources.

1/ Since microcircuits supplied to SMDs may be manufactured both onshore and off-shore and often involve manufacturers with multiple facilities and production locations for various processes, the CAGE code shown represents the SMD product ship control location. An additional "point of contact" is shown when a military technical support group is available and when it differs from the SMD product ship control location.

2/ Elantec announced end-of-life March 1994, but will still supply class M product to selected contracts.

3/ Performance's logic business has been bought by Cypress. Performance still supplies microprocessors.
