COMMERCIAL ITEM DESCRIPTION

HAM PRODUCTS, FULLY COOKED, CANNED OR PACKAGED

The U.S. Department of Agriculture has authorized the use of this commercial item description by all Federal agencies.

1. SCOPE.

1.1 This Commercial Item Description (CID) covers fully cooked Pullman and pear-shaped ham, in cans or packaged, processed for refrigerated storage, packed in commercially acceptable containers, suitable for use by the Federal Government.

2. CLASSIFICATION.

2.1 The canned or packaged ham shall conform to the types, styles, shapes, and containers in the following list which shall be specified, in the solicitation, contract, or purchase order.

Types, styles, shapes, and containers.

Type I - Ham - complies with U.S. Department of Agriculture, Food Safety and Inspection Service Regulations for ham, including 20.5 percent protein fat-free (PFF) requirement.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Head, Food Quality Assurance Staff, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2506, South Building, P.O. Box 96456, Washington, DC 20090-6456 or FAX (202) 690-0102.

Check the source to verify that this is the current version before use.

Type II - Ham with Natural Juices - complies with Regulations for product so labeled, including 18.5 percent PFF requirement.
Type III - Ham, Water Added - complies with Regulations for product so labeled, including 17.0 percent PFF requirement.
Type IV - Ham and Water Product - complies with Regulations for product so labeled, with less than 17.0 percent PFF requirement.

Style A - Ham (formerly labeled "sectioned and formed")
Style B - Ham, chunked and formed

Shape 1 - Pullman
Shape 2 - Pear-shaped

Container a - Canned
Container b - Packaged

3. SALIENT CHARACTERISTICS.

3.1 Processing: The canned or packaged ham shall be prepared in accordance with good commercial practice and shall conform to the applicable provisions of the Meat and Poultry Inspection Regulations of the U.S. Department of Agriculture.

3.2 Raw ingredients: Pork from the leg shall be the only meat ingredient. There shall be no coarse-textured dark meat present. There shall be no intact shank meat, as evidenced by characteristic shape, color, or composition. However, ground or chopped shank meat may be used as a binder.

3.3 Finished product: The canned or packaged ham shall remain intact when removed from the packaging. Style A ham slice(s) shall have the appearance of whole muscle product. Polyethylene bag liner, when applicable, shall completely cover the ham. The weight of the canned or packaged ham shall be as specified in the solicitation, contract, or purchase order.

3.3.1 Odor and flavor: The canned or packaged ham shall have an odor and flavor characteristic of cooked ham.

3.3.2 Color: The canned or packaged ham shall have a color characteristic of cooked ham. The canned or packaged ham shall not have foreign colored areas measuring 0.5 square inch (16.13 square mm) or more in size.

Check the source to verify that this is the current version before use.

3.3.3 Discoloration due to processing: The canned or packaged ham shall be free from more than 4 spots of discoloration each greater than 0.3 inch (7.62 mm) in any dimension, or any single spot greater than 0.8 inch (20.32 mm) or more in any dimension.

3.3.4 Cavities: The canned or packaged ham shall be free from cavities on the exterior surface 0.5 inch (12.7 mm) or more in width, 1.0 inch (2.54 cm) or more in length, and 0.5 inch (12.7 mm) or more in depth.

3.3.5 Air or gelatin pockets: The canned or packaged ham shall be free from 2 or more air or gelatin pockets that are greater than 0.25 square inch (4.03 square mm) and 0.3 inch (7.62 mm) deep, and a sliced surface area shall not be composed of 5 percent or more such defects in any dimension.

3.3.6 Fat on the sliced surface: The canned or packaged ham shall be free from fat on the sliced surface which is more than 0.25 inch (6.35 mm) for a distance of 1.0 inch (2.54 cm) or more to a depth of 0.25 inch (6.35 mm) throughout the 1.0 inch x 0.25 inch (2.54 cm x 6.35 mm) area and a sliced surface area shall not be composed of 5 percent or more of fat.

3.3.7 Bone, cartilage, blood clots or bruises, and glandular material: Bone 0.2 inch (5.08 mm) and cartilage 0.3 inch (7.62 mm) or more in any dimension, blood clots or bruises 0.5 square inch (16.13 square mm) or more in area, and glandular material 0.1 inch (2.54 mm) or more in any dimension are prohibited.

3.3.8 Pale, soft, and exudative areas or capillary hemorrhages: Pale, soft, and exudative areas or capillary hemorrhages 1.0 square inch (6.452 square cm) or more in size shall not be present in the product.

3.3.9 Skin: Skin 1.0 inch (2.54 cm) or more in any dimension shall not be present in the product.

3.3.10 Determination for separation of muscles: There shall not be undue separation of muscles. **1/**

1/ For determination of muscle separation, 2 slices approximately 0.3 inch (7.62 mm) in width shall be made. If either slice does not remain intact when suspended by the smallest, most loosely connected portion of the slice, there is deemed to be undue separation of muscles.

4. REGULATORY REQUIREMENTS.

4.1 The meat component and the finished product shall originate and be produced, processed, and stored in plants regularly operating under Meat and Poultry Inspection Acts and regulations

promulgated thereunder of the U.S. Department of Agriculture. The delivered prepared, canned or packaged ham shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sale of the prepared, canned or packaged ham within the commercial marketplace. Delivered prepared, canned or packaged ham shall comply with all applicable provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

5. QUALITY ASSURANCE PROVISIONS.

5.1 Contractor's certification. The contractor shall certify and maintain substantiating evidence that the prepared, canned or packaged ham offered meets the salient characteristics of this CID, and that the prepared, canned or packaged ham conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same prepared, canned or packaged ham offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

5.2 Quality assurance. When required in the solicitation, contract, or purchase order, the Meat Grading and Certification Branch, Livestock and Seed Division, Agricultural Marketing Service, U.S. Department of Agriculture, will determine the quality assurance of the canned or packaged ham according to Meat Grading and Certification Branch procedures. The canned or packaged ham shall be examined for conformance to the product requirements in this CID, solicitation, contract, or purchase order, and, when applicable, the United States Standards for Condition of Food Containers in effect on the date of the solicitation and in accordance with the requirements in the applicable regulations.

6. PACKAGING.

6.1 Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and case marking shall be as specified in the solicitation, contract, or purchase order.

7. NOTES.

7.1 Purchasers shall specify:

- Type(s), style(s), and shape(s) of ham required.
- Container(s) for ham.
- Weight of the ham desired.
