INTERIM COMMERCIAL ITEM DESCRIPTION

SWAB STICK, ISOPROPYL ALCOHOL-ACETONE IMPREGNATED

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by the Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-RST, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

This Interim Commercial Item Description covers a sterile disposable swab stick impregnated with 70% alcohol, 10% acetone, suitable for topical defating and cleansing.

Salient Characteristics:

Shall be a package of one sterile, disposable swab stick impregnated with 70% alcohol, 10% acetone, suitable for topical defating and cleansing.

Shall be sterile when tested in accordance with the USP.

Each impregnated swab shall be individually packaged and sealed in a plastic laminate material that maintains sterility and precludes evaporation until manually opened.

Each rayon-tipped swab shall be approximately 4 inches long.

All ingredients shall be of pharmaceutical grade.

Workmanship. The Impregnated Swab Stick shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). Each impregnated swab shall be individually sealed in plastic laminate material capable of maintaining sterility and precluding evaporation of the alcohol unless package is damaged or opened. Fifty individually sealed swabs shall be packaged in a box. One package containing 10 boxes (500 swabs), as specified, constitutes one unit.

AMSC/NA FSC 6510

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item. Testing and examination shall be conducted to determine compliance with all specification requirements. Test methods shall be suitable, accurate and reproducible.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105 and as specified herein. The unit of product for examination shall be one impregnated swab stick. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5 maximum percent defective.

Metric Products - Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.
