INCH-POUND

MIL-C-63106A(AR)
AMENDMENT 3
15 February 1993
SUPERSEDING
AMENDMENT 2
31 Jan 1986

MILITARY SPECIFICATION

COUNTERMEASURE, CHAFF: M-1

This Amendment forms a part of Military Specification MIL-C-63106A(AR), dated 14 June 1983, and is approved for use by the U.S. Army Armament, Munitions and Chemical Command, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 1

2.1, Government documents: Under Specification Military, Add:

"MIL-STD-410 - Nondestructive Testing Personnel.
MIL-STD-453 - Inspection Radiographic.
MIL-C-81467 - Chaff, Countermeasures RR-129/ALE-29A".

2.1.1 Add "C" to MIL-STD-810.

PAGE 3

* Add new paragraph 3.7: (This paragraph has been rewritten since previous amendment.)

"3.7 Radiographic examination. Chaff samples shall not exhibit any indication of deformed or missing components, or foreign material. The samples shall exhibit the proper dipole cuts, correct number of cuts, and correct assembly sequence and component orientation. Minimum optical density of each radiograph in the area being inspected shall not be less than 1.25 and shall be within a density range that will permit proper identification of defects. (A radiographic standard shall be established prior to lot acceptance testing)."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

PAGE 4

* Table I, Under Countermeasure Chaff, M1 (Dwg. 9311402), Examination of Defects, Delete in its entirety and substitute "Examination of defects/Radiographic examination 90 - 3.2, 3.7 4.4.2.6, 4.5.5".

PAGE 7

4.4.2.2 Minor 201, delete "(from "o" ring cavity)".

Minor 203, delete "o" Ring Height" and substitute "width of Pin Lock".

PAGE 9

4.4.2.4, Add:

"Major 104: Chaff material measurement and coatings, 0.40%, 3.2, (a).

NOTE (a): See MIL-C-81467, Para. 3.2."

PAGE 11

* 4.4.2.6, Add: "Major 104: Radiographic examination, 0.40%, 3.7, 4.5.5."

PAGE 15

4.5.1.1 Humidity. Line four (4) add "C" to MIL-STD-810.

4.5.1.2 Transportation vibration. Line two (2) add "C" to MIL-STD-810.

4.5.1.3 Helicopter vibration. Line three (3) add "C" to MIL-STD-810.

PAGE 17

* Add new paragraph 4.5.5: (last sentence deleted from previous amendment)

"4.5.5 Radiographic examination. Radiographic equipment procedures and evaluation shall be in accordance with MIL-STD-453. Radiographic personnel shall be qualified in accordance with MIL-STD-410. Prior to functional testing, the chaff samples shall be examined in accordance with MIL-STD-453 procedure. Two exposures shall be made of each chaff, each forming a 90 degree angle with the other and with the longitudinal axis of the chaff. Examination of the radiographic shall be made to determine compliance with the applicable requirement (see 3.7). (Non-destructive)"

Add new paragraph 4.5.5.1:

"4.5.5.1 Radiograph sensitivity. The penetrameter used in the application specified in MIL-STD-453 shall be designed and constructed to insure a 2.0 percent sensitivity or better.

The penetrameter shall be made of plastic having a density equal to the chaff. One penetrameter shall be used on each film exposed. The film density measurement shall be made with a photo electric densitometer calibrated to National Bureau of Standards (Photographic Step Tablet)"

The margins of this amendment are marked with a asterisk or vertical lines to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to eveluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
