COMMERCIAL ITEM DESCRIPTION

COVER, IRONING BOARD

The General Services Administration has authorized the use of this commercial item description in preference to Type IV, Classes A and B of Federal Specification RR-I-660.

This commercial item description (CID) covers two classes of household ironing board covers.

Class A - Cotton sheeting, plain or sized
Class B - Cotton sheeting, teflon treated or silicone-aluminum coated

Salient characteristics.

The covers shall be made from unbleached 100 percent cotton sheeting or drill cloth of one piece construction. The cotton shall be identified by the ASTM D 276, Standard Methods for Identification of Fibers in Textiles, latest revision.

The class A cotton sheeting shall have a minimum yarn count of 48 x 44 and weigh a minimum of 3.5 ounces per square yard before sizing.

The class B cotton sheeting shall have a minimum yarn count of 44 x 40 and weigh a minimum of 2.5 ounces per square yard before teflon treatment or silicon-aluminum coating The finished cover shall show no pin holes when held up to a bright light.

The covers shall fit standard household type ironing boards from 52-1/2 inches long x 13 inches wide to 54-1/2 inches long x 15 inches wide. The covers shall be a tapered envelope type, and the taper shall start 36 inches ±1 inch from the wide end and tapering toward the narrow end. The edges of the cover shall have one of the following means of holding the cover on the ironing board:

(1) a tie cord extending the entire distance around the cover with a 3/8 inch minimum width tie cord hem or binding sewn to the cover. The hem or binding shall have an opening at either end for extending the ends of tie cord. The cord shall extend a minimum of 4 inches beyond the opening;

(2) tie tapes not less than 16-1/2 inches long sewn into the hem, one at each side of the cover, 24 to 28 inches from each end;

(3) An elastic binding extending the entire distance around the cover with a 3/8 inch minimum width hem or binding sewn to the cover.

Workmanship. The finished cover shall be free from tears, holes, cuts, weak spots, puckers, skipped stitches, open seams, or other defects that may affect appearance or serviceability.

Quality assurance provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. Inspection records of the examinations or tests shall be kept complete and available to the Government as specified in the contract or purchase order. The Government reserves the right to perform any of the inspections set forth in the CID where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Inspection of the end item. Sampling for examination shall be in accordance with MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes. The inspection level shall be S-2, with an acceptable quality level (AQL) of 4.0 percent defective. The lot size shall consist of all ironing board covers of the same class offered for acceptance at one time. The sample unit shall be one cover.

Examination. Samples shall be examined for compliance with the specified requirements for material, shape, dimensions, and workmanship.

Regulatory requirements. In accordance with the Section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or purchase order.

Notes:

Copies of military standards may be obtained from the procuring activity or as directed by the contracting officer.

Applications for copies of American Society for Testing and Materials (ASTM) Standards should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.

WHEN THIS COMMERCIAL ITEM DESCRIPTION IS USED FOR PROCUREMENT, THE COMMERCIAL ITEM CERTIFICATION CLAUSE DOES NOT NEED TO APPEAR IN THE SOLICITATION.
