COMMERCIAL ITEM DESCRIPTION

PEELER, POTATO, HAND

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-P-20583.

The potato peeler covered by this description is intended for use in peeling potatoes where potato-peeling machines are not feasible and for peeling and coring other vegetables and fruits.

Salient characteristics:

Design and construction. The configuration is shown on figure 1, and except for dimensional limits, is illustrative only.

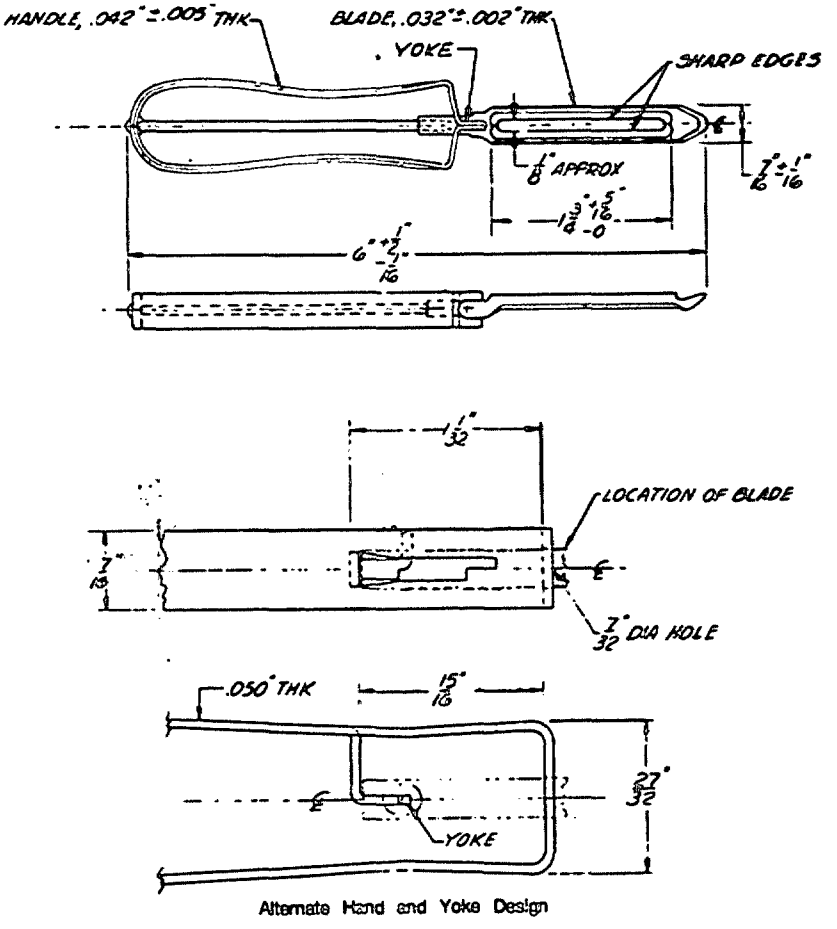

Figure 1. Peeler, Potato, Hand

Blade. The blade shall be fabricated of carbon steel sheet or strip and shall be heat treated to a hardness of not less than 47 nor more than 55 on the Rockwell C scale, and shall have sharp edges for peeling as shown in figure 1. The blade shall be securely attached to the stem, or when the alternate handle and yoke design is used, the blade shall be attached to the yoke.

Check the source to verify that this is the current version before use.

Stem. The stem when used, shall be fabricated of carbon steel.

Handle. The handle shall be fabricated of carbon steel. The stem and blade assembly or the blade, when the alternate handle and yoke design is used, shall move freely in the handle and the yoke shall prevent complete rotation of the handle.

Workmanship. All burrs, rough and sharp edges or corners shall be removed from the item. The potato peeler shall not be bent, damaged, or distorted. All spot welds shall be sound and smooth and free from pits, holes and fissures. The finished peeler shall be free from any defects which may affect appearance or serviceability.

Blade hardness. The hardness of the blade shall be determined in accordance with method 243 of Federal Test Method Standard No. 151.

The issue of Federal Test Method Standard No. 151 in effect on the date of the solicitation shall be used to determine compliance with these requirements.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Federal Test Method Standards are available from Specification Unit (WYSIS), 7th & D Streets, SW, Washington, DC 20407.
