Tolerances:

Shank diameter (D) of .076 or less shall have tolerances of ± 0.002 inch. Shank diameters greater than .076 shall have tolerances of ± 0.004 inch.

Head diameters (H) shall be ± 10 percent of the specified H for hand-driven nails as per the manufacturers' specification for machine-driven nails.

Length (L) for nails 2-1/2 inches or less the tolerances shall be ± 1/16 inch. For nails greater than 2-1/2 inches in length the tolerances shall be ± 3/32 inch.

Steel wire. Steel wire shall be of good commercial quality, entirely suitable for the purpose and sufficiently ductile to insure that the finished product shall withstand, without fracture, cold bending through 180 degrees over a dimeter not greater than the diameter of the wire.

Workmanship. Items covered by this description shall be true to shape, well finished, reasonably free from imperfections, clean and free of corrosion. Mechanically driven cohered items shall be uniform and properly alligned in their assembled form.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Note. Purchaser should specify sizes, and when mechanical driven quality is required in contract or ordering documents.
