COMMERCIAL ITEM DESCRIPTION

CALCULATING MACHINE, HAND-HELD (PROGRAMMABLE)

The General Services Administration has authorized the use of this commercial item description.

This description covers hand-held programmable calculators, including a carrying case, owner's handbook, programming guide, battery charger, and optional printer and software. The calculator is intended for use in general and scientific computations.

Salient characteristics:

Weight: The calculator without carrying case, shall weigh no more than 20 ozs.

Dimensions Length (maximum - 8 inches) Width (maximum - 3.5 inches).

Power Replaceable battery or power pack. The calculator shall be capable of operating while recharging. The calculator shall be capable of operating with a current of 115V, 60 HZ.

Display: Digits (minimum) - 12 including decimal point and sign (+/-). The display may be LCD (Liquid Crystal Diode) or LED (Light-Emitting Diode). The display shall be easily readable, and consist of English characters not less than 1/8 inch in height.

Calculating and Operating capabilities and functions (minimum):

Basic for arithmetic functions (+, -, -, x).
Lnx, $\log^x$, e^x, y^x, 10^x, x^2, $\sqrt{x}$, π.
Degrees -- radians; DD, MM, SS.
Scientific notation (8 digit mantissa, 2 digit exponent).
Hyperbolic and inverses.
Rectangular - - polar coordinates and inverse.
Trigonometric (sin, cos, tan, and inverses) in degrees, radians, or grads.
Mean and standard deviation.
Linear regression.
Floating and fixed decimal.
Factorial function.
60 data memories, direct and indirect (minimum).
900 program steps, expandable to 2,000 program lines, algebraic operating system (AOS) or Reverse Polish Notation (RPN), with complete program editing.

AMSC N/A FSC 7420

DISTRIBUTION STATEMENT A. Approved for public release, distribution is unlimited.

Accessories.

a. Carrying case.
b. Recharger AC adaptor (with minimum 6 foot cord).
c. Owner's handbook.
d. Programming guide.
e. Printer (optional).
f. Software package (optional).
g. RS232 interface port (optional).

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Packaging and marking. Military packaging shall be specified when shipments are to overseas Department of Defense (DOD) consignees. Commercial packaging may be specified for shipments to DOD consignees within the Continental United States and to non-DOD consignees worldwide. When a supplier's normal packaging will satisfy the requirements for military packaging, it may be used.

Military packaging. Each calculating machine with accessories shall be preserved and packed to protect against physical damage and deterioration in a logistic environment characterized by the following:

1. Multiple handling during transportation and intransit storage.
2. Shock, vibration, and static loading forces during worldwide shipment by all transport modes.
3. Uncontrolled warehouse storage for extended periods.
4. Weather exposure during shipment and intransit transfers.
5. Stacking loads during shipment and storage.

Quantities of calculating machines with accessories destined to a single addressee may be unitized into one or more unit loads.

Commercial. Each calculating machine with accessories shall be packaged in accordance with the supplier's normal method for retail distribution. Individually packaged calculating machines with accessories shipped to a single destination may be unitized to permit handling as a single unit. Shipping containers shall comply with Uniform Freight Classification or National Freight Classificaton rules.

Marking. Unit, intermediate (when provided), and exterior packs shall be marked with the item nomenclature, stock or part number, quantity per pack, and contract number as a minimum; additional marking shall be as specified in the contract or order. Exterior packs shall have in addition the complete consignee's address. Markings shall be applied in a legible manner, in a contrasting color of an appropriate size, and of waterproof materials.

Quality assurance. The calculators shall be examined for the following defects. Presence of one or more defects shall be cause for rejection.

1. The design is not as specified.
2. Accessories missing or not as specified.
3. Packaging and marking not as specified.
4. Calculator, recharger or printer malfunctions during check of functions.

Certification of commercial item. The contractor shall certify that the product offered to the Government meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product as the manufacturer's current product offered by the contractor in the commercial market place for at least one year preceding the solicitation. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Small business. A small business that cannot meet the certification-of-commercial-item requirement of this document, may make an offer under this solicitation; and, if such small business is the apparent successful offeror, the Government may require the small business to submit a sample calculator and accessories. Any such calculator and accessories may be evaluated for this solicitation if time to contract award permits. Such evaluation would be to determine conformance to all requirements of this commercial item description and to determine equivalency to calculators and accessories available in the commercial marketplace in the areas of durability, human factors engineering, and safety. It should be noted that bid samples are not required unless specifically requested by the contracting officer. Note. The Government may elect not to evaluate a bid sample from an apparent low bidder for award for this solicitation if a determination of urgency is made by the contracting officer. The bid sample would then be evaluated prior to future solicitation for comparable items.

Notes:

1. The procuring activity should specify the type of programs required, and whether a printer or RS232 port is required.
2. When this commercial item description is used for procurement, the commercial item certification clause must appear in the solicitation.
