COMMERCIAL ITEM DESCRIPTION

OPAQUES, PHOTOGRAPHIC FILM-PLATE RETOUCHING

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-O-22039C.

This description covers opaques in paste form intended for use in retouching photographic films or plates.

Salient characteristics:

Design. The opaques shall be colloidal dispersion of opaque pigment; water shall be used as a thinning agent. The opaques shall not separate or crystallize. The opaque shall prevent the transmission of light thru the plate when applied and dried.

Pigment, form, and packaged units. The opaque pigment, form and packaged units shall be as shown below:

Pigment	Form	Packaged Units
Graphite	Paste	1-ounce (29.6 milliliters [ml]) jar
Graphite	Paste	2-ounce (59.1 ml) jar
Red Rouge	Paste	1-ounce (29.6 ml) jar
Red Rouge	Paste	2-ounce (59.1 ml) jar
Red Rouge	Paste	4-ounce (118.3 ml) jar
Red Rouge	Paste	8-ounce (236.6 ml) jar

Working properties. The opaques shall brush freely and smoothly with no tendency to pull.

Drying. After drying, the opaques shall not be sticky, leave no mark when touched by the finger, and shall not wipe off.

Paste opaque thinning. Opaques shall thin to a uniform consistency.

Removal. Opaques shall wash off with water without leaving stains.

Storage stability. The opaques shall not separate, crystallize or become lumpy while in storage, and shall not be cracked, chipped, broken, split, or unable to be opened when removed from storage.

AMSC N/A FSC 6750

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to maximum extent practical.

Packaging and marking. Military packaging shall be specified when shipments are to overseas Department of Defense (DoD) consignees. Commercial packaging may be specified for shipments to DoD consignees within the Continental United States and to non-DoD consignees worldwide. When a supplier's normal packaging will satisify the requirements for military packaging, it may be used.

Military packaging. Each opaque shall be preserved and packed to protect against physical damage and deterioration in a logistic environment characterized by the following:

1. Multiple handling during transportation and intransit storage.
2. Shock, vibration, and static loading forces during worldwide shipment by all transport modes.
3. Uncontrolled warehouse storage for extended periods.
4. Weather exposure during shipment and intransit transfers.
5. Stacking loads during shipment and storage.

Quantities of opaques of like type destined to a single addressee may be unitized into one or more unit loads.

Commercial. Each opaque shall be packaged in accordance with the supplier's normal method for retail distribution. Opaques of like type shipped to a single destination may be unitized to permit handling as a single unit. Shipping containers shall comply with Uniform Freight Classification or National Motor Freight Classification Rules.

Safety. The opaques shall be provided with instructions for safe use, handling and disposal. Warnings shall be provided, as necessary, to advise user of hazards and methods to combat the hazards.

Marking. Unit, intermediate (when provided), and exterior packs shall be marked with the item nomenclature, stock or part number, quantity per pack, and contract number as a minimum; additional marking shall be as specified in the contract or order. Exterior packs shall have in addition the complete consignee's address. Markings shall be applied in a legible manner in a contrasting color, of an appropriate size, and of waterproof materials.

Quality assurance. The opaques shall be examined for the following defects. Presence of one or more defects shall be cause for rejection.

1. Pigment, form or packaged units not as specified.
2. The opaques separate or crystallize.
3. Working properties not as specified.
4. Drying properties not as specified.
5. Thinning and removal properties not as specified.
6. Packaging and marking not as specified.

Check the source to verify that this is the current version before use.

7. Design properties not as specified.
8. Storage stability not as specified.

Certification of commercial item. The contractor shall certify that the product offered to the Government meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product as the manufacturer's current product offered by the contractor in the commercial marketplace for at least one year preceding the solicitation. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Small business. A small business that cannot meet the certification-of-commercial-item requirement of this document, may make an offer under this solicitation; and, if such small business is the apparent successful offeror, the Government may require the small business to submit a sample photographic opaque. Any such opaque may be evaluated for this solicitation if time to contract award permits. Such evaluation would be to determine conformance to all requirements of this commercial item description and to determine equivalency to photographic opaques available in the commercial marketplace in the areas of durability, human factors engineering, and safety. It should be noted that samples are not required unless specifically requested by the contracting officer. Note. The Government may elect not to evaluate a sample from an apparent low bidder for award for this solicitation if a determination of urgency is made by the contracting officer. The sample would then be evaluated prior to future solicitation for comparable items.

Notes:

1. The procuring agency should specify pigment, form, and package units.
2. When this commercial item description is used for procurement, the commercial item certification clause must appear in the solicitation.
