COMMERCIAL ITEM DESCRIPTION

BRAZING ALLOYS, ALUMINUM AND MAGNESIUM, FILLER METAL

The General Services Administration has authorized the use of this Commercial Item Description in preference of Federal Specification QQ-B-655.

This commercial item description covers aluminum and magnesium brazing filler metal alloys having melting points above 800°F.

Salient Characteristics:

1. Brazing filler metal alloys shall be of the following classifications and forms, as specified:

a. Classification

Aluminum-Silicon
- BAlSi-2
- BAlSi-3
- BAlSi-4
- BAlSi-5

Magnesium
- BMg-1

b. Forms

	Wire	Rod	Sheet	Powder
BAlSi-2	-	-	X	-
BAlSi-3	X	-	-	-
BAlSi-4	X	-	-	X
BAlSi-5	-	-	X	-
BMg-1	X	X	-	-

2. Chemical compositions, sizes and tolerances for the forms of the brazing alloys listed above shall conform to the requirements of the American Welding Society (AWS) specification A5.8 entitled "Brazing Filler Metal."

(Copies of AWS A5.8, "Brazing Filler Metals" are available from the American Welding Society, 2501 Northwest 7th Street, Miami, Florida 33125.)

FSC 3439

Check the source to verify that this is the current version before use.

3. Workmanship. Brazing filler metals alloys shall be free from excessive oxide, dirt, or other foreign element which will affect the brazing qualities of the material.

The issue of AWS A5.8 in effect on the date of the solicitation shall be used to determine compliance with stated requirements.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing and marking. The packaging and packing shall be in accordance with normal commercial practice and shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.
