MILITARY SPECIFICATION

GAGE, FOOD BLEMISH, VETERINARY

This limited coordination Military Specification has been prepared by the Defense Personnel Support Center based upon currently available technical information, but it has not been approved for promulgation as a coordinated revision to MIL-G-36752(DSA-DM). It is subject to modification. However, pending its promulgation as a coordinated Military Specification, it may be used in procurement.

1. SCOPE

1.1 Scope. This specification covers one type of plastic food blemish gage suitable for use in food inspection procedures. The gage consists of 5 individual scales as follows: (a) Linear, (b) Circular, (c) Elliptical, (d) Quadrangular, (e) Rectangular/Circular.

2. APPLICABLE DOCUMENTS

2.1 Specifications, standards and drawing. The following documents, of the issue in effect on date of invitation for bids or request for proposals, form a part of this specification to the extent specified herein:

SPECIFICATIONS

Federal

PPP-B-566	Boxes, Folding, Paperboard.
PPP-B-636	Box, Fiberboard.
PPP-B-676	Box, Setup.

FSC 6695

STANDARDS

Military

MIL-STD-105	Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129	Marking for Shipment and Storage.

DRAWING

Defense Personnel Support Center (DPSC)

25052	Gage, Food Blemish, Veterinary.

(Copies of specifications, standards and drawing required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Material. All materials used shall conform to the requirements of DPSC Drawing 25052, and subparagraphs indicated hereinafter.

3.1.1 Plastic. The plastic sheets used shall be clear, transparent, rigid, polyvinyl chloride. The laminated sheets for each scale shall be of the same material.

3.1.2 Printing. The ink used for lettering and line work shall be permanent, suitable for use on vinyl plastic sheets, and suitable for lamination.

3.1.3 Telescoping eyelet and neck washer. The hardware shall be supplied without burrs, cracks and protrusions.

3.2 Design and construction. The food blemish gage shall conform to DPSC Drawing 25052 for design, construction and dimensions. The corners of each laminated vinyl sheet shall be rounded, and all edges shall be polished to give a smooth finish.

Check the source to verify that this is the current version before use.

3.3 Performance. The assembled food blemish gage shall be capable of complying with the following requirements:

3.3.1 Flexibility. The gage scales shall not break, crack, delaminate, warp, or otherwise become damaged when tested in accordance with 4.4.1.

3.3.2 Tightness of securing hardware. Each gage scale shall be sufficiently tight so that it will remain in the position to which it is rotated, but still slack enough to move freely when tested in accordance with 4.4.2.

3.4 Identification marking. Each gage shall be permanently marked with the applicable National Stock Number and manufacturer's name or registered trademark. Such marking shall be located as indicated on DPSC Drawing 25052.

3.5 Workmanship. Workmanship shall be first class throughout, and the gage scale shall be free of defects which detract from its appearance or may impair its serviceability. The gage scales shall be properly aligned, and supplied without contamination, warpage or roughness. All surfaces of the gage scales shall be smooth and transparent. The applied printing shall be complete, legible, continuous and unsmudged.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of 3 years after delivery of the supplies to which such records relate.

Check the source to verify that this is the current version before use.

4.1.2 Inspection. Inspection, as used in this specification, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

4.2 Sampling.

4.2.1 For examination. Sampling for examination shall be conducted in accordance with MIL-STD-105 and Table I. The unit of product for examination purposes shall be the individual gage.

Table I. Sampling for examination

Type defect	Inspection level	AQL (percent defective)
For visual examination		
Major defects	II	2.5
Minor defects	II	4.0
For dimensional examination	S-3	2.5

4.2.2 For tests. Sampling for tests shall be conducted in accordance with MIL-STD-105 and Table II. The unit of product for testing purposes shall be the individual gage.

Table II. Sampling for tests

Characteristic	Requirement	Test procedure	Inspection level	AQL
Flexibility	3.3.1	4.4.1	S-1	*
Tightness of securing hardware	3.3.2	4.4.2	S-1	*

* Acceptance number shall be zero.

4.3 Examination. The gages shall be examined to determine compliance with all requirements contained in this specification.

Check the source to verify that this is the current version before use.

4.3.1 Classification of defects. Examination shall be conducted in accordance with Table III. Examination shall not be restricted to the classified possible defects listed in the table.

Table III. Classification of defects

Categories	Defects
Major	
101	Gage not properly assembled.
102	Gage not free of warpage, deformation and delamination.
103	Gage scales not transparent and clear within functional requirement of usage.
104	Gage scales not free of grease, cuts and cracks.
105	Printing not complete, correct, legible and permanent.
106	Hardware or gage scales not free of burrs, protrusions and sharpness.
Minor	
201	Surfaces or edges of gage scales not smooth, or not free of roughness, scratches and depressions.
202	Printing not free of smudges.
203	Any printing not continuous for a space over 1/16 inch.
204	Gage scales not free of embedded foreign material.
205	Gage scales not free of haze and craze.
206	Gage scales not clean or dry.

4.3.2 Dimensional examination. The gage shall be examined for defects in dimensions. Any dimension not within the specified tolerance shall be classified as a defect.

4.4 Tests. Tests shall be conducted to determine compliance with specification requirements.

4.4.1 Flexibility. The gage scales in the closed position shall be bent along the long dimension to form an arch with a three-inch span. The gage scales shall be bent on both sides.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T09:15Z
Check the source to verify that this is the current version before use.

4.4.2 Tightness of hardware. The gage scales shall be opened and spread out so that the corners on the other side of the pivot do not overlap adjacent scales. The fanned-out scales shall be suspended by hand, by gripping in succession each corner of the individual scale opposite the pivot. The gage scale shall then be swung into the closed position.

* 4.5 Examination for preparation for delivery. An examination shall be made to determine whether the packaging, packing and marking comply with the requirements of Section 5. Defects shall be scored as specified in Table IV. Sampling shall be in accordance with MIL-STD-105. The sample unit shall be one container fully prepared for delivery. The lot shall be the number of containers offered for inspection at one time. The inspection level shall be S-2, and the acceptable quality level shall be 4.0 defects per hundred units.

* Table IV. Examination for preparation for delivery

Examination	Defect
Containers	Not as specified.
Quantity	Quantity in interior packages and shipping containers not as specified.
Packaging and packing materials	Any component missing or damaged.
Workmanship	Inadequate application of components, such as incomplete closure of container flaps, tape improperly applied or containers distorted.
Markings	Omitted, incorrect, illegible, improper size, location, sequence or method of application.

* 5. PREPARATION FOR DELIVERY

5.1 Packaging. Packaging shall be Level A or C as specified (see 6.2).

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T09:15Z
Check the source to verify that this is the current version before use.

5.1.1 Unit of issue. Each food gage consisting of five individual scales, as specified, constitutes one unit of issue.

5.1.2 Level A.

5.1.2.1 Unit package. Each unit consisting of five gages shall be thoroughly cleaned and individually wrapped in tissue or other suitable material. The five individually wrapped gages shall be further packaged in a box of appropriate size constructed in accordance with PPP-B-566 or PPP-B-676. Closure of the box shall be adequate to prevent accidental opening.

5.1.2.2 Intermediate package. Six unit packages shall be packaged in a snug-fitting box constructed in accordance with PPP-B-566, PPP-B-676 or PPP-B-636, class domestic. Closure shall be adequate to prevent accidental opening.

5.1.3 Level C. Units shall be packaged in standard commercial containers of the size and kind commonly used, which will afford the degree of protection required for shipment and use of the product for its intended purpose.

5.2 Packing. Packing shall be Level A, B or C as specified (see 6.2).

5.2.1 Level A. Twenty four intermediate packages shall be packed in an exterior container designed for a type 2 load and constructed in accordance with PPP-B-636, class domestic. Closure, strapping and waterproofing shall be as specified in PPP-B-636.

5.2.2 Level B. Twenty four intermediate packages shall be packed in an exterior container designed for a type 2 load and constructed in accordance with PPP-B-636, class domestic. Closure shall conform to method II as specified in PPP-B-636.

5.2.3 Level C. The subject commodity shall be packed in substantial commercial containers of the type, size and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to point of delivery called for in the contract or purchase order.

Check the source to verify that this is the current version before use.

5.3 Marking.

5.3.1 Interior packages. Each unit package and each intermediate package shall be marked in accordance with MIL-STD-129. Contract or purchase order number and name of contractor shall be shown.

5.3.2 Exterior container. Exterior container shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use. Gage is intended to be used to measure or gauge the area of blemish on fresh fruits and vegetables to determine compliance with specifications.

6.2 Ordering data. Procurement documents should specify the following:

a. Title, number and date of this specification.
b. Selection of applicable levels of packaging and packing (see 5.1 and 5.2)
c. National Stock Number (NSN).

6.3 This specification covers the following item appearing in the Federal Supply Catalog:

National Stock Number	Item Identification
6695-00-409-9808	Gage, Food Blemish, Veterinary, Plastic

6.4 The margins of this specification are marked with an asterisk to indicate where changes (additions, modifications, corrections, deletions) from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
