MILITARY SPECIFICATION

MANUAL, TECHNICAL AND CHECKLIST: AIRCREW, NUCLEAR WEAPON DELIVERY, AIR-TO-AIR, PREPARATION OF

1. SCOPE

1.1 This specification covers the detail requirements for the preparation of technical manuals and checklists for nuclear weapon (air-to-air missiles and rockets) delivery for aircrew use.

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on the date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

SPECIFICATIONS

Military

MIL-C-38778	Checklists: Title Page, List of Effective Pages, Printing and Binders, General Requirements for Preparation Of
MIL-M-38784	Manuals, Technical: General Requirements for Preparation Of
MIL-P-38790	Printing Production of Technical Manuals: General Requirements for (Photolithographic Negatives, Reproduction Assembly, Printing)

(Copies of documents required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 General requirements

3.1.1 General specifications. The requirements of MIL-P-38790, MIL-M-38784, and MIL-C-38778 apply as requirements of this specification to the extent specified herein. Unless otherwise specified in the contract, the technical manual and checklist (if required) shall be submitted in the form of negatives.

3.1.1.1 Lists. Lists of tables, illustrations, and time compliance technical orders (TCTOs) shall not be required.

3.1.1.2 Illustrations. Illustrations may be used more than once, providing such use is deemed essential. Figure number and figure titles shall not be used in the aircrew procedures. If required for emphasis, the applicable step number may be placed below the figure.

3.1.1.3 Revisions. Change bars shall not be required in revisions.

3.1.1.4 Nomenclature. Nomenclature shall be standardized throughout the manual and among related manuals. If authorized, nomenclature may be shortened or abbreviated to its common name.

3.1.1.5 Text presentation. Text shall be presented with unjustified margins. Standard office typewriter may be used to prepare reproducible copy. Final type size within a manual shall be approximately 10 point (pt). Artwork shall be integrated with the text.

3.1.1.6 Flagging. Flags may be used, if required, to denote aircraft models, daily checks, and similar items. Flagging will normally be a parenthesized entry; e.g., (P), (RO), etc.

3.1.1.7 Classified manuals. Classified manuals shall be marked as required by MIL-M-38784.

3.1.2 Type of manual to be prepared. The technical manual shall be standard size, 8-1/4 by 10-3/4 inches trim size. If required, a checklist (4-1/2 by 7 inches trim size) shall be prepared.

Check the source to verify that this is the current version before use.

3.2 Arrangement. The technical manual shall have the following arrangement:

Front Matter
Section I - Description
Section II - Normal Aircrew Procedures
Section III - Emergency Aircrew Procedures
Section IV - Supplementary Data

3.2.1 Front matter. The front matter shall consist of the following in the order indicated:

Title Page
List of Effective Pages
Table of Contents
Introduction

3.2.1.1 Title page. The title page shall be prepared in accordance with MIL-M-38784. In addition, one of the following notices, as applicable, shall be placed on the title page:

a. For unclassified manuals:

Each transmittal of this document outside the Department of Defense must have prior approval of the Technical Order Distribution Control Activity. Refer to TO 00-5-2.

b. For classified manuals:

In addition to security requirements which apply to this document and which must be met, each transmittal outside the Department of Defense must have prior approval of the Technical Order Distribution Control Activity. Refer to TO 00-5-2.

3.2.1.2 List of effective pages. The list of effective pages shall be prepared in accordance with MIL-M-38784.

3.2.1.3 Table of contents. The table of contents shall list the section titles and their applicable page numbers. In addition, the first page of each section shall include a table of contents listing the major headings within the section. Table of contents shall normally be typed single column. Text within each section shall begin immediately below the section table of contents.

3.2.1.4 Introduction. The introduction shall be prepared in accordance with the general requirements of MIL-M-38784. The following additional requirements apply:

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T07:20Z
Check the source to verify that this is the current version before use.

a. Definitions of warning, caution, and note.

b. List of applicable reference documents. (This list shall be held to a minimum, showing essential documents only.)

c. Statements concerning technical responsibility for the manual and submission of improvement reports and comments.

d. List of nonstandard abbreviations, if any, used in the manual.

e. TCTO listings are not required.

3.2.2 Section I - Description. This section shall contain descriptions of the nuclear armament, launching mechanism, and pertinent armament controls and indicators. Methods of attack using the nuclear armament shall be listed and briefly explained. General aircraft information and description shall not duplicate flight manual data.

3.2.3 Section II - Normal aircrew procedures. This section shall contain procedures for a tactical mission from ground alert and before flight inspection through afterlanding. Each procedural step shall consist of an unclassified demand-response line, followed by an amplification, if required. These procedures shall reflect the applicable safety rules and policies. Normally, procedures for nuclear weapons only shall be included. Only essential illustrations shall be used.

3.2.3.1 Content of Section II. The following items shall be included in Section II as applicable:

Introduction
Ground alert
Before flight inspection
Preflight procedures
After takeoff procedures
(Armament) Attack procedures
Escape maneuver procedures
Aborted attack procedures
Before landing procedures
Afterlanding procedures
Practice alerts, exercises, inspections, and evaluations (if required)

Specific wording of headings may be altered to fit the weapon system or to aline this section with corresponding portions of the flight manual and with the system nuclear safety rules; inapplicable headings may be omitted. The introduction to the section shall contain a statement of the scope of the section and any general information applicable to the procedures.

3.2.4 Section III. Emergency aircrew procedures. This section

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T07:20Z
Check the source to verify that this is the current version before use.

shall contain procedures for all emergencies involving the nuclear weapon or the aircraft with a nuclear weapon aboard. Procedures shall be presented for both inflight and ground emergencies, including weapon jettison and firefighting.

3.2.4.1 Emergency pages shall be marked in accordance with the requirements of MIL-M-38784.

3.2.5 Section IV - Supplementary data. This section shall include information on escape maneuvers, weapon effects, limitations, jettison ballistics, target kill probability, and any other pertinent information relative to the nuclear weapon(s).

3.3 Checklist. Normally, nuclear weapon delivery checklist data shall be included in the flight manual checklist. If a separate nuclear weapon delivery checklist is required, the provisions of MIL-C-38778 for Type I, class 6 checklists shall apply. Checklist steps shall consist of the unclassified demand-response line items (steps) from the aircrew procedures; these steps shall be identically numbered. Flight manual checklist data shall not be duplicated unless such duplication is required to provide continuity of procedures. Emergency checklist data for the nuclear weapon shall be included.

3.4 Maintenance of the manual. The technical manual and checklist (if required) shall be maintained in accordance with the requirements of MIL-M-38784.

4. QUALITY ASSURANCE PROVISIONS

4.1 Manuals and checklists (Basic and Revisions)

4.1.1 In-process review. Draft manuscripts shall be reviewed as scheduled during the writing process. Comments and corrections resulting from this review shall be incorporated into the review copy or preliminary technical order (TO). The provisions of TO 00-5-1 for validation shall apply.

4.1.2 Review conference verification. Unless otherwise specified in the contract, a review conference shall be held at the contractor's facility, or if combined with a verification, at an operational location. Review copies shall normally be in the form of a preliminary TO, with text double spaced and containing all required art. The manual shall be reviewed/verified for technical adequacy and accuracy. Classification markings, if required, shall also be reviewed at this time. Before preparation of reproducible copy is begun, a final manuscript review may be required to insure incorporation of all review/verification inputs.

Check the source to verify that this is the current version before use.

4.1.3 Prepublication review. Reproducible copy of the manual and checklist (if required) shall be reviewed by the Government as contractually specified for technical adequacy and accuracy and for conformance to specifications. Reproducible copy shall meet the requirements of MIL-M-38784.

4.2 Changes. Unless otherwise specified in the contract, all changes shall receive in-process and prepublication reviews. Extensive changes (such as addition of a new weapon capability) may require verification. If so, the provisions of 4.1.2 herein shall apply.

4.3 Negatives. Negatives shall meet the requirements of MIL-P-38790.

4.4 Reproduction assembly sheets. Reproduction assembly sheets shall be prepared as specified in MIL-P-38790.

5. PREPARATION FOR DELIVERY

5.1 Negatives shall be prepared for shipment as required in MIL-P-38790. The provisions of MIL-P-38790 relative to use of reproduction assembly sheets with negative shipments shall apply.

6. NOTES

6.1 Intended use. Manuals (and checklists, if required) prepared according to this specification are for aircrew use in air-to-air delivery of rockets and missiles containing nuclear warheads.

6.2 TO numbering. Although the assignment of TO numbers is governed by Air Force regulations, the following is provided for information. Manuals for air-to-air delivery of nuclear weapons are numbered as aircraft dash 29 TOs; e.g., TO 1F-xxx-29. Checklist, when required is numbered TO 1F-xxx-29CL-1.

6.3 Ordering Data. Procurement documents should specify:

a. Title, number, and date of this specification.

b. If a checklist is to be required.

SPECIFICATION ANALYSIS SHEET

Form Approved
Budget Bureau No. 119-R004

INSTRUCTIONS

This sheet is to be filled out by personnel either Government or contractor, involved in the use of the spe fication in procurement of products for ultimate use by the Department of Defense. This sheet is provided for a aining information on the use of this specification which will insure that suitable products can be procured with inimum amount of delay and at the least cost. Comments and the return of this form will be appreciated. Fold ines on reverse side, staple in corner, and send to preparing activity *(as indicated on reverse hereof)*.

ECIFICATION

RGANIZATION *(Of submitter)* | CITY AND STATE

ONTRACT NO. | QUANTITY OF ITEMS PROCURED | DOLLAR AMOUNT $

TERIAL PROCURED UNDER A

☐ DIRECT GOVERNMENT CONTRACT ☐ SUBCONTRACT

HAS ANY PART OF THE SPECIFICATION CREATED PROBLEMS OR REQUIRED INTERPRETATION IN PROCUREMENT USE?

A. GIVE PARAGRAPH NUMBER AND WORDING.

B. RECOMMENDATIONS FOR CORRECTING THE DEFICIENCIES.

COMMENTS ON ANY SPECIFICATION REQUIREMENT CONSIDERED TOO RIGID

IS THE SPECIFICATION RESTRICTIVE?

☐ YES ☐ NO IF "YES", IN WHAT WAY?

REMARKS *(Attach any pertinent data which may be of use in improving this specification. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity)*
