MILITARY SPECIFICATION

PROBE, TOTAL TEMPERATURE, TYPE MA-1

This amendment forms a part of Military Specification MIL-P-25726B(ASG), 10 June 1959, and has been approved by the Department of the Air Force and by the Naval Air Systems Command.

Page 9, figure 6: Delete dimension "1.700 ± .010" and substitute "1.600 ± .010".

Page 10, paragraph 3.7.1: Delete, and substitute:

"3.7.1 *Electrical characteristics.* The resistance element shall be constructed of pure platinum wire and the resistance-versus-temperature relationship shall follow the Callendar-Van Dusen equation:

$$\frac{R_T}{R_0} = 1 - \alpha\left[T - \delta\left(\frac{T}{100} - 1\right)\left(\frac{T}{100}\right) - \beta\left(\frac{T}{100} - 1\right)\left(\frac{T}{100}\right)^3\right]$$

Where R_T = resistance at temperature T in °C, $\alpha = 0.003925$, $\delta = 1.45$, $\beta = 0$ (for temperatures above 0°C) and $\beta = 0.10$ (for temperatures below 0°C) and T = temperature °C. The resistance element shall be adjusted to 50.00 ohms at 0°C. Deviations from the Callendar-Van Dusen equation over the temperature range of the probe shall be not greater than allowed by the following equation:

$$\Delta T = \pm (0.25 + 0.005T)$$

Where ΔT is the allowable deviation in °C and T is the temperature in °C. (The negative sign, when T is below 0°, should not be used in this equation.)"

Page 14, paragraph 4.5.6, equation (3): Delete, and substitute:

"$a—b_1 = (a—b)e^{-t'T}$".

Page 15: Add as new paragraphs:

"4.5.15 *Salt Spray.* The probe shall be subjected to a salt spray test in accordance with Procedure I of MIL-E-5272. No damage shall result from this test which will affect subsequent operation of the probe.

"4.5.16 *Fungus.* The probe shall be subjected to a fungus test in accordance with Procedure I of MIL-E-5272. No damage shall result from this test which will affect subsequent operation of the probe.

SPECIFICATION ANALYSIS SHEET

Form Approved Budget Bureau No. 119-R004

INSTRUCTIONS

This sheet is to be filled out by personnel either Government or contractor, involved in the use of the specification in procurement of products for ultimate use by the Department of Defense. This sheet is provided for obtaining information on the use of this specification which will insure that suitable products can be procured with a minimum amount of delay and at the least cost. Comments and the return of this form will be appreciated. Fold on lines on reverse side, staple in corner, and send to preparing activity.

SPECIFICATION MIL-P-25726B(ASG)-3 Probe, Total Temperature, Type MA-1

ORGANIZATION | CITY AND STATE

CONTRACT NO. | QUANTITY OF ITEMS PROCURED | DOLLAR AMOUNT $

MATERIAL PROCURED UNDER A
☐ Direct Government Contract ☐ Subcontract

1. HAS ANY PART OF THE SPECIFICATION CREATED PROBLEMS OR REQUIRED INTERPRETATION IN PROCUREMENT USE?
   A. GIVE PARAGRAPH NUMBER AND WORDING

   B. RECOMMENDATIONS FOR CORRECTING THE DEFICIENCIES

2. COMMENTS ON ANY SPECIFICATION REQUIREMENT CONSIDERED TOO RIGID

3. IS THE SPECIFICATION RESTRICTIVE?
   ☐ YES ☐ NO IF "YES" IN WHAT WAY?

4. REMARKS (Attach any pertinent data which may be of use in improving this specification. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.)
