PROCUREMENT SPECIFICATION	AIR FORCE-NAVY AERONAUTICAL STANDARD	AN3104
MIL-E-6719	ELBOW - SHIELDED SPARK PLUG	

SUPERSEDES USAF DRAWINGS 41A3595 AND 40A1633

NOTICE—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

NOTE—This drawing was approved by joint action of the Air Force and Navy Department in the Air Force-Navy standardization program. Any recommendation for change to this standard should be submitted to the Air Force-Navy project engineer for the procurement specification cited herein. Upon approval by the Air Force-Navy project engineer, such change will be effective for that procurement only. Changes will not be made retroactive to material produced under contracts or orders in existence at the time such changes are approved, except when, in the opinion of the procuring activity, failure to make such changes would result in unsatisfactory material or unnecessary expense. Suggested changes which affect the basic dimensions, design, assembly, or interchangeability of parts shall not be made effective on new design, but when this is not practicable, they may be made effective on current design not later than six months after the latest date of approval shown.
