MATERIAL: The stirring bars shall be made of polytetrafluoroethylene and permanent Alnico magnets.

DESIGN: The bars shall be egg (elliptical) shaped. The magnet shall be enclosed by the plastic to form a leakproof cover.

USE: This stirring bar is designed especially for use in round bottom vessels.

NOTE: 1. Items differing from this Military Standard by minor variation in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

APPROVED 26 JUL 1982 REVISED

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
