* Glass Packaging Institute.

MATERIAL: Caps shall be made of polypropylene, O-ring seal is made of fluoroelastomer. Plug in types II and III caps shall be made of ethylenetetrafluoroethylene. All caps shall be autoclavable.

DESIGN: Type I cap shall provide a tight friction-fit for storing or transporting liquids and to prevent aerosols at low-speed centrifugation. These caps will not provide a liquid tight seal during high-speed centrifugation.

Types II and III caps seal centrifuge tubes and bottles for use at high speeds. Each assembly consists of a screw cap, a plug, and an O-ring. Type III cap has a shoulder support ring to prevent bending; shifting or collapse of bottle neck.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

APPROVED 30 JUN 1983 REVISED

USER ACTIVITIES: ARMY - MD, DM
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
NAVY - OS
AIR FORCE - 82

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
