COMMERCIAL ITEM DESCRIPTION

JUICE, LEMON, FROZEN (CONCENTRATED)

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Military Specification MIL-J-11174.

This Commercial Item Description (CID) covers concentrated frozen lemon juice, packed in commercially acceptable containers, suitable for use by the Federal Government

Salient characteristics.

The frozen concentrated lemon juice shall be prepared from food grade materials and shall be processed using good manufacturing procedures The product shall contain the concentrated juices of clean, sound, mature, high-acid lemons, lemon oil, and other ingredients The high-acid lemon varieties shall contain not less than 5 0 percent average acid content calculated as anhydrous citric acid The oil of lemon shall be cold-pressed, partially or fully deterpened oil therefrom, or combinations thereof, which are free of terebinthine odor, and shall meet the requirements for lemon oil specified in the Food Chemicals Codex The finished product shall be promptly frozen to a temperature of 0°F (-18°C) or lower

The acid content of the frozen concentrated lemon juice (calculated as anhydrous citric acid) shall not be less than 24.00 g acid/100 mL concentrate and the recoverable oil (by volume) shall be 0.22 mL $\pm$ 0.1 mL/100 mL concentrate

One volume of thawed lemon juice concentrate mixed with three like volumes of water shall result in a product similar to freshly expressed lemon juice The reconstituted juice shall possess the typical yellow color, a distinct lemon flavor, and an odor of single-strength lemon juice The product shall contain no coagulation of the pulp, shall be practically free of seed particles and rag, and shall contain no peel, or other extraneous plant material

FSC 8915

DISTRIBUTION STATEMENT A Approved for public release, distribution is unlimited

Analytical requirements

Chemical analyses shall be made in accordance with the following methods in the Official Methods of Analysis of the Association of Official Analytical Chemists·

Test	Chapter and Section	Method
Acid (anhydrous citric acid)	Fruits and Fruit Products	Acidity (Titratable) of Fruit Products
Oil (recoverable)	Fruits and Fruit Products	Titrimetric

Contractor's certification

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID, conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices, has a national or regional distribution from storage facilities located within the United States, its territories, or possessions, and is sold on the commercial market The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder

Quality assurance

When the solicitation, contract, or purchase order requires that product quality and/or acceptability be determined, the Processed Products Branch (PPB), Fruit and Vegetable Division, Agricultural Marketing Service, U S Department of Agriculture, shall be the certifying activity and shall make the

determination in accordance with applicable PPB procedures. The product shall be examined and/or analyzed in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers.

Preservation, packaging, packing, labeling, and marking.

The juice shall be preserved, packaged, packed, labeled, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable

For Department of Defense procurements.

The following requirements are applicable when specified by the contracting officer

A. Commercial packaging Thirty fluid ounces of product shall be packaged in a metal, composite, or plastic can in accordance with good commercial practice

B. Commercial packing Twelve cans of product shall be packed in a container complying with the National Motor Freight Classification or Uniform Freight Classification, as applicable, except metal fasteners shall not be used in the final closure of fiberboard boxes.

C. Export packaging Thirty fluid ounces of product shall be packaged in a metal, composite, or plastic can in accordance with commercial practice

D. Export packing Twelve cans of product shall be packed in a snug-fitting, fiberboard box, constructed and closed in accordance with Style RSC or RSC-L, as applicable, Grade V3c, V3s, or V4s of PPP-B-636. Each shipping container packed with composite or plastic cans shall have the inside of the container fitted with a box liner conforming to Type CF, Class Weather-Resistant, Variety DW, Grade V15c of PPP-B-636 Each fiberboard box shall be reinforced with nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape in accordance with the appendix of PPP-B-636.

E. Unit loads (commercial and export) Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078. When unit loads are strapped, strapping shall be limited to nonmetallic strapping, except for Type II, Class F loads
