COMMERCIAL ITEM DESCRIPTION

SAUCE, SPAGHETTI, MEATLESS

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description.

This Commercial Item Description (CID) covers meatless spaghetti sauce, packed in commercially acceptable containers, suitable for use by the Federal Government.

Salient characteristics.

Spaghetti sauce is a ready-to-use sauce prepared from food grade material and processed using good manufacturing procedures.

Ingredients (may include): Water, tomato products, sugar, olive oil or soybean and/or cottonseed oil, onion powder, garlic powder, citric acid, natural flavorings, starches, and other ingredients.

Consistency: Pleasingly smooth texture and mouth feel, practically free from particles of seed, skin, or core material.

Processing: Time and temperature shall preserve product without impairing quality.

Color: Bright, typical red-orange tomato color.

Suspension: Shall not stratify nor separate.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and any data which may improve this document should be sent to: Head, Food Quality Assurance Staff, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2506, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FSC 8940

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:33Z
Check the source to verify that this is the current version before use.

Flavor: Well blended tomato flavor and aroma, free from any objectional flavors, with reasonable amount of salt and spices.

Defects: Free from any defect that more than slightly affects the appearance or eating quality.

Analytical requirements.

Product shall conform to the following analytical requirements:

Soluble Solids	10.0 to 14.0 percent
Sodium Chloride	0.5 to 2.0 percent
pH	3.9 to 4.4
Consistency	Not more than 10.5 centimeters in 30 seconds at 20°C ± 1°C.

Analytical methods required for the above levels shall be in accordance with the Official Methods of Analysis of the AOAC, or other methods specified as follows:

Test	Method number/Method
Solids (Soluble) in Tomato Products 1/	932.12
Sodium Chloride	971.27
pH of Acidified Foods	981.12
Consistency	Bostwick Consistometer

1/ To determine the soluble solids in spaghetti sauce, place 1 to 2 drops of spaghetti sauce on the surface of a refractometer that is cooled to 20°C. Allow the sample to stand for at least one minute on the closed refractometer to allow for temperature equilibrium. Read the Brix value and report it accordingly.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics and requirements of this CID; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories, or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery

from point of origin and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance with the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product within the commercial marketplace. Delivered product shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When the solicitation, contract, or purchase order requires that product quality or acceptability or both be determined, the Processed Products Branch (PPB), Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture shall be the certifying activity and shall make the determination in accordance with applicable PPB procedures. The product shall be examined or analyzed or both in accordance with applicable provisions in the CID, and when applicable, the United States Standards for Condition of Food Containers.

Preservation, packaging, packing, labeling, and marking.

The spaghetti sauce shall be preserved, packaged, packed, labeled, and cases marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the solicitation, contract, or purchase order, shall be acceptable. Shipping containers shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurements (Only).

The following requirements are applicable when specified by the contracting officer.

A. Commercial packaging. The product shall be packaged in accordance with commercial practice and as specified in Table I.

TABLE I. Packaging parameters

Unit pack	Net weight	Number per shipping container
1-gallon jar (3.785 L)	7 pounds, 7 ounces (3.374 kg)	4
603 x 700 can	6 pounds, 10 ounces (3.005 kg)	6

Check the source to verify that this is the current version before use.

B. Commercial packing. The product shall be packed in a manner to ensure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. The shipping container shall be in accordance with the National Motor Freight Classification or Uniform Freight Classification, as applicable. The number of packages per shipping container shall be as specified in Table I.

C. Export packaging. One hundred and six ounces (3.005 kg) of product shall be packaged in an open top style, round, metal can, size 603 x 700, with a soldered or welded side seam and compound-lined, double-seamed ends. The can shall be made throughout from not less than 1.00/0.25 or 0.75/0.25K pound per base box electrolytic tinplate. The can shall have a sufficient baseplate weight and temper to protect the product during shipment and storage. The entire inside area of the 1.00/0.25 can shall be enameled; the 0.75/0.25K can shall be double enameled. Alternatively, the can ends may be fabricated from ECCS plate, fully enameled both inside and out. Cans shall have the interior side seam striped. The can shall be coated overall on the outside with a coating conforming to Type I, or when specified, Type III of TT-C-495.

D. Export packing. Six cans, arranged three in length, two in width, and one in depth shall be packed in a fiberboard box constructed, closed, and reinforced in accordance with Style RSC, V3c, V3s, or V4s of PPP-B-636. Style RSC boxes may be top-opening or end-opening. Reinforcement shall be limited to nonmetallic strapping or pressure-sensitive adhesive, filament-reinforced tape.

E. Unit loads (commercial and export). Shipping containers shall be arranged in unit loads in accordance with MIL-L-35078.

F. Marking (commercial and export). Marking of unit packs, shipping containers, and unit loads shall be in accordance with MIL-STD-129.
