COMMERCIAL ITEM DESCRIPTION

TUNIC, WOMAN'S, HOSPITAL DUTY UNIFORM (HDU)

The General Services Administration has authorized the use of this commercial item description as a replacement for MIL-T-44293 for all Federal agencies.

1. SCOPE. This commercial item description covers the requirements for a woman's tunic made of polyester/cotton. The tunic shall be worn as a hospital duty or food handler's uniform by female personnel of the Department of Defense.

2. CLASSIFICATION. The tunic shall be furnished in the following sizes:

Sizes: 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24
or
(X-Small, Small, Medium, Large, X-Large)

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FNSC, 2800 South 20th Street, Philadelphia, PA 19145-5099.

AMSC N/A FSC 8410

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

3. SALIENT CHARACTERISTICS

3.1 Description. The tunic shall have short sleeves, with a princess style line front and back; slide fastener front closure with an open neck collar, or a button front closure with a lapel collar; and two lower front pockets. All visible seams shall be clean finished (See Figure 1).

3.2 Basic material. The material for the tunic shall be a blend of cotton and polyester, twill or plain weave, durable press, having a minimum of 35 percent cotton and the remainder polyester. The cloth shall weigh a minimum of 5 ounces per square yard, and the color shall be bleached optical white. The cloth shall have a minimum breaking strength of 140 pounds in the warp direction, and 70 pounds in the filling direction when tested in accordance with ASTM D-5034. The cloth shall have a minimum warp and filling tearing strength of 5.0 pounds when tested in accordance with ASTM D-1424. The maximum shrinkage or elongation shall be 2.0 percent in both warp and filling direction when tested in accordance with AATCC 124.

3.2.1 Slide fastener. The slide fastener shall be polyester, continuous monofilament, separating, with top stops and automatic lock. The color of the slide fastener tape and components shall be a white to approximate the basic cloth, and the bottom of the slide fastener closure shall end not less than three inches from the bottom hem.

3.2.2 Buttons and buttonholes. The buttons shall be plastic, size 25-30 line, 4-hole, white or pearlescent white. They shall be sewn securely to the left front to correspond with buttonholes. The buttonholes shall be straight cut or whip type and shall be cut so that they fit securely over the buttons.

3.2.3 Thread and stitching. The thread shall be white, in accordance with type I or type II, Ticket Nos. 50 and 70 of A-A-50199.

3.3 Labels. Each tunic shall contain a commercial-type identification label (containing the item name, contract number, and contractor's name), size label, and a fiber content and care instruction label. The labels may be combined. The labels shall be located inside at center back and caught in the stitching joining the collar to the tunic. The label marking shall have sufficient fastness to prevent bleeding and to ensure that the label remains legible after laundering.

3.4 Label/tag. Each item shall be individually bar-coded with a paper tag for personal clothing items. The paper tag shall be standard bleached sulfate having a basis weight of 100 pounds. The paper used for the tags shall have a smooth finish to accept thermal transfer and direct printing. The tags shall have a hole and shall be attached to each item by a fastener, clearly legible and readable by a scanner. The bar coding element shall be a 13 digit national stock number (NSN). The bar code type shall be a medium to high code density and shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

3.5 Sizes and measurements. The finished tunic shall conform to the measurements below.

TABLE I. Finished measurements in inches

Sizes	4	6	8	10	12	14	
Chest 1/	18-1/2	19	19-1/2	20	20-3/4	21-1/2	Tolerance: 1/2
Sizes	16	18	20	22	24		
Half Chest 1/	22-1/4	23	24	25	26		Tolerance: 1/2

Back length 2/ Back shall be 26-1/2 ± 3/4 inch for all sizes.

NOTE: The measurements shall be taken with the buttons or slide fastener closed and the tunic laid flat.

1/ Measure across front at base of armholes at folded edge.

2/ Measure center back from base of collar to bottom of tunic.

3.5.1 Patterns. The government shall furnish a single size pattern. The contractor is responsible for grading patterns for additional sizes. The standard patterns provide a seam allowance of 1/2 inch for safety stitch seams. Minor modifications are permitted to accommodate automation provided that the finished tunic conforms to the cited design and finished measurements. Commercial patterns may be used in lieu of government-furnished patterns provided that the finished tunic conforms to the cited design and finished measurements.

4. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this commercial item description and conforms to the producer's own quality assurance practices. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

5.2 Market acceptance criteria. The item offered, or a generic equivalent, must have been sold to the commercial market or to the Government for at least two years.

5.3 Visual examination. Each tunic shall be examined for the defects listed below in accordance with ANSI/ASQC Z1.4.

5.3.1 Defects. Any hole, cut, or tear; color not as specified; any spot or stain; raw edges, open seams, thread ends not removed, or loose tension resulting in loose seams; any material defects, distorted parts or poor workmanship; any component part omitted, defective, or type not as specified; label omitted, incorrect, or illegible; measurement of item not as specified; bar code omitted or not readable by scanner; human-readable interpretation (HRI) omitted or illegible; bar code not visible on folded, packaged item; bar code causes damage to the item; item not packaged as specified in the contract or purchase order.

5.4 Acceptance criteria. Acceptance criteria shall be as specified in the contract or purchase order.

6. PACKAGING

6.1 Preservation, packing, and marking. The preservation, packing, and marking shall be as specified in the contract or purchase order.
