MILITARY STANDARD

AUTOMATED ENGINEERING
DOCUMENT PREPARATION SYSTEM

FASTENERS

TO ALL HOLDERS OF DOD-STD-35-23A(MI):

1. THE FOLLOWING PAGES OF DOD-STD-35-23A(MI) HAVE BEEN REVISED AND SUPERSEDE THE PAGES LISTED.

NEW PAGE	DATE	SUPERSEDED PAGE	DATE
v	30 JUNE 1992	v	9 MARCH 1979
3	30 JUNE 1992	3	14 JANUARY 1979
4	30 JUNE 1992	4	14 JANUARY 1979
5	14 JANUARY 1979	(Reprinted without change)	
6	30 JUNE 1992	6	9 MARCH 1979
7	30 JUNE 1992	7	9 MARCH 1979
8	9 MARCH 1979	(Reprinted without change)	
9	9 MARCH 1979	(Reprinted without change)	
10	30 JUNE 1992	10	9 MARCH 1979
11	30 JUNE 1992	11	9 MARCH 1979
12	9 MARCH 1979	(Reprinted without change)	

2. RETAIN THIS NOTICE PAGE AND INSERT BEFORE THE TABLE OF CONTENTS.

3. Holders of DOD-STD-35-23A(MI) will verify that page changes and additions indicated above have been entered. The notice page will be retained as a check sheet. This issuance, together with appended pages is a separate publication. Each notice is to be retained by stocking points until the Military Standard is completely revised or canceled.

3. DEFINITIONS

Definitions contained in DOD-STD-35 are applicable to Fasteners.

Reprinted without change

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T20:54Z
Check the source to verify that this is the current version before use.

4. GENERAL REQUIREMENTS

4.1 Introduction. In order to properly prepare an SRS for Fasteners, it is necessary to use DOD-STD-35 in conjunction with this dash-numbered part. In the event the instructions or the writing methodology are not followed, an AEDPS edit routine will print error messages rather than the desired MSE document.

4.2 Specification Requirement Sheet (SRS). SRS requirements described in DOD-STD-35 are applicable to Fasteners.

4.3 Configuration.

4.3.1 Dimensions. SRS requirements for dimensisions described in DOD-STD-35 are applicable to Fasteners.

4.3.2 Illustrations. Illustrations appoicable to Fasteners are contained in Appendix A to this document.

4.4 Units of measure. The International System of Units (SI) or inch-pound units (U.S.), may be used to specify characteristics (e.g. weight, dimensions). Refer to ASTME380 for guidance in using SI. However, when different units of measure are available for specifying a characteristic, only one may be used. Both units of measure cannot appear in the same MSE.

Check the source to verify that this is the current version before use.

5. DETAILED REQUIREMENTS

5.1 Introduction. This section provides instructions for completion of the SRS and references for instructions on specific requirements contained in DOD-STD-35.

5.2 MSE formats. AEDPS has the capability to prepare a six-section or a single-section document. The six-section document appears similar to a six-section military specification. The single-section document appears similar to a military specification sheet. Specification requirements described in DOD-STD-35 are applicable to either of the formats selected. It is mandatory that one of the two following codes and an "X" be entered on the SRS to create the desired MSE format:

a. 0700 for a six-section format

b. 0800 for a single-section format

5.3 Referenced documents. Section 2 of the MSE may contain a list of all referenced documents within Sections 3, 4, and 5 of the MSE. Instructions for referencing documents to appear in Section 2 of the forthcoming MSE are contained in DOD-STD-35.

5.4 Deleted

Check the source to verify that this is the current version before use.

5.5 Tabulation. Instructions for tabulation are provided in DOD-STD-35. Table III provides codes for column headings which may be used for Fasteners characteristics. When different units of measure within one system (U.S. or SI) are available for specifying a characteristic, only one of the units may be tabulated; e.g. either ounces or pounds.
