Armed Services Procurement Regulation

1-1206	Purchase Descriptions

Forms

DD Form 1418-1	Procurement Data Identification Checklist
DD Form 1423	Contract Data Requirements List

(Copies of specifications, standards, drawings, and publications required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. DEFINITIONS

3.1 Hardware item. A hardware item is a configuration item as defined in MIL-STD-480 and includes any item, component, equipment, and parts thereof separately procured. It may be: (a) part of a larger system (e.g. missile guidance system), (b) a part used in any Government equipment (e. g. resistor, fuel pump, capacitor), or (c) a support item (e. g. ground, power supply, fuel truck, handtools) etc. (Source: MIL-STD-480.)

3.2 Procurement data package. Procurement data package is a generic term applicable to types of technical data when used for procurement purposes. It is a composite of specifications, plans, drawings, standards, and such other data as may be necessary to describe existing materiel so they may be procured by the method contemplated. (Source: MIL-STD-789.)

3.3 Specification. A specification is a document used in procurement which clearly and accurately describes the essential and technical requirements for items, materials, or services, including procedures by which it can be determined that the requirements have been met. Specifications for items and materials may also contain preservation, packaging, packing, and marking requirements.

4.8 Revisions to and maintaining a procurement data package. Procurement data packages shall be maintained current with revised data, new data, and new lists as a result of design changes. (Reference: MIL-STD-480 and MIL-STD-481 as contractually applied. NOTE: MIL-STD-480 superseded ANA Bulletin 445, however, ANA Bulletin 445 should be referenced if a contract requirement.) Procurement data packages may also be revised/changed as a result of the method of procurement for the item changing.

4.8.1 Procurement data packages received by a contractor which were not developed under provisions of this standard, and do not include such information as purchasing, manufacturing, and verification data, shall be upgraded to incorporate such information in accordance with this standard, and a complete new procurement data list prepared when specifically required by the contract.

4.8.2 When a method of procurement for an item is changed, the contractor shall develop a new procurement data package for the item which will support the items latest method of procurement.

4.8.3 When new data are required as a result of design changes, the design activity adding the data shall include its name and code identification on the new data and provide a revised procurement data list for the package. The same shall apply when existing data within a package requires revision, and new data are prepared; except that new data shall also include a note to the effect: This (document type) (replaces, supplements, etc)(document, number, page number, and revision letter) and the (replaced documents manufacturer's code identification number). (For example, this drawing replaces drawing 1234 revision C MFGR's, code 00000.) Any other associated lists affected shall also be updated in the same manner.

4.8.4 When existing data are changed, the design activity making such change shall not in any way, obliterate, or interfere with the identification of the previous design activity. (Code identification number, etc.)

4.9 Preparation of data for procurement data packages. The preparation of all data furnished/identified for a procurement data package shall be as contractually set forth on the DD Form 1423 for the type and kind of data included. When preparation requirements for the type and kind of document needed are not set forth on the DD Form 1423, preparation shall be accomplished in accordance with the practices used by the procurement data package activity preparing the package. When a specification is prepared for a procurement data package and the contract does not set forth preparation requirements for the type to be prepared, MIL-STD-490 shall apply for preparation. When drawings are prepared for a procurement data package and the contract does not set forth preparation requirements, the requirements of MIL-D-1000, form 1 shall apply.
