MS35967-2	250	83	50	83

MATERIAL: Nickel, 99.9 percent, spun and hardened according to ASTM B 162.

DESIGN: Crucible shall be cup-shaped, made of one piece construction and have a flat bottom.

Covers shall be provided for use with corresponding sizes of crucibles. Covers shall be flat style pressed from one piece with depression in center for centering on crucible and with extension to serve as a handle.

© NOTES:

1. The procurement document for MS35967-1 and -2 is ASTM E 785.
2. Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements as specified herein.
3. In the event of a conflict between the text of this standard and the references cited herein, the text of this standard shall take precedence.
4. Referenced Government documents of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation form a part of this standard to the extent specified herein.

APPROVED 29 SEP 1959 REVISED (A) 09 NOV 1967 (B) 21 JAN 1981 (C) 15 SEP 1988

USER ACTIVITIES ARMY - CE

REVIEW ACTIVITIES ARMY - ME, MD

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
