PART NUMBER	DIMENSIONS (CM) H	W	D	RPM	POWER REQUIREMENT
MS36502-1	34	15	36	800	115V AC, 60 Hz

MATERIAL: The apparatus shall be made of steel and other materials that will meet the design and performance of this standard.

DESIGN: The apparatus is essentially a drill press with the vertical motion inverted, the drilling platform being elevated with respect to a fixed bearing head by a compound lever mechanism. The borer will produce a range of diameters from 3 to 32 mm. An ejection rod shall be supplied to remove stopper plugs.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

APPROVED 7 JAN 1983 REVISED

USER ACTIVITIES: ARMY - MD, DM
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
NAVY - OS
AIR FORCE - 03

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
