MILITARY SPECIFICATION

FUZE, MECHANICAL TIME, M591, ASSEMBLY

This amendment forms a part of Military Specification MIL-F-60890(MU) dated 6 April 1971.

Add paragraphs 6.9, 6.9.1, 6.9.2, 6.9.3, 6.9.4 and 6.9.5

6.9 Statement of Safety Requirements

6.9.1 Safety Limitations and Precautions Relating to Production Equipment and Facilities:

Assembly of explosive elements into fuzes shall be performed under protective hoods with static electricity controls. Protective barrier should be used when performing the Mil-Standard tests.

6.9.2 Hazards Presented by Materials:

Possible injury (burns or dismemberment) to limbs and body from flash or detonation of explosive elements.

6.9.3 Known Hazards or Hazardous Areas:

All areas in which explosive elements are used in assembly operations or stored.

6.9.4 Specific Instructions Relative to Manufacture, Handling, Storage and Shipment of Material: The number of persons exposed to explosive operations and the quantities of explosive materials should at all times be the minimum consistent with safety and the efficiency of operation. Signs setting forth personnel and explosive limits also should be posted. Prior to starting operations including any of the hazardous materials or items described herein, a standard operating procedure should be developed and approved by the contractor outlining the specific requirements to safely perform the particular operation. All personnel concerned should be cognizant of SOP contents. Applicable portions of the approved procedure should be conspicuously posted convenient to all stations involved in the operation for guidance of all personnel.
