COMMERCIAL ITEM DESCRIPTION

ADDITIVE, DISHWASHING RINSE

The General Services Administration has authorized the use of this commercial item description for all federal agencies.

1. SCOPE. This commercial item description (CID) covers a low-foaming rinse additive concentrate for use in the final rinse cycle of a mechanical dishwashing machine equipped with a suitable rinse injector device.

2. SALIENT CHARACTERISTICS.

2.1 General. The additive shall consist of wetting agents, combined with or without a defoamer, as necessary, to meet the requirements of this CID. The rinse additive shall be suitable for use in a commercial dishwashing machine.

2.2 Prohibited materials. The additive shall not contain any materials above the threshold for trace amount that have a severity category of either catastrophic or critical in the prohibited and restricted chemicals tables in the Naval Sea Systems Command (NAVSEA) List of Targeted Chemicals (N-LTC) appendix of T9070-AL-DPC-020/077-2, NAVSEA Hazardous Material Avoidance Process. The threshold for trace amount is defined as less than 1 percent for non-carcinogenic compounds and less than 0.1 percent for carcinogenic compounds.

2.3 pH. The pH of an un-diluted solution shall be a minimum of 2.1 and a maximum of 8.0 when tested in accordance with ASTM E70.

2.4 Flash point. The flash point shall be greater than 93.3 °C (200 °F) when tested in accordance with ASTM D56.

2.5 Eutrophication and phosphate. The additive shall comply with the U.S. Environmental Protection Agency (EPA) Safer Choice Standard eutrophication and phosphate criteria.

2.6 Aquatic toxicity. The additive, when used as directed on the label in a use-dilution solution, shall not be harmful to aquatic life in accordance with the United Nations Economic Commission for Europe (UNECE) Globally Harmonized System of Classification and Labelling of Chemicals (GHS) criteria for acute and chronic aquatic toxicity.

2.7 Cleaning efficiency. When prepared as directed on the label, the rinse additive solution shall have a cleaning efficiency rating of not less than 3 when tested in accordance with ASTM D3556, or other equivalent or comparable test methods.

2.8 Appearance. The rinse additive shall be distinctly colored with a stable colorant so that the liquid level in the rinse additive reservoir in the dishwashing machine is readily visible.

3. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials or biobased materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data that may improve this document should be sent to: Commander, Naval Sea Systems Command, ATTN: SEA 05S, 1333 Isaac Hull Avenue, SE, Stop 5160, Washington Navy Yard DC 20376-5160 or emailed to CommandStandards@navy.mil, with the subject line "Document Comment". Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at https://assist.dla.mil.

Check the source to verify that this is the current version before use.

4. PRODUCT CONFORMANCE PROVISIONS. The products provided shall meet the salient characteristics of this Commercial Item Description, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial marketplace. The government reserves the right to require proof of such conformance.

5. PACKAGING. Preservation, packing, and marking shall be as specified in the contract or order.

6. NOTES.

6.1 Source of documents.

6.1.1 ASTM International. ASTM standards are available from ASTM International, 100 Barr Harbor Dr., P.O. Box C700, West Conshohocken, PA 19428-2959 or online at www.astm.org.

6.1.2 EPA. The U.S. EPA Safer Choice Standard may be obtained from the Environmental Protection Agency, Ariel Rios Building, 1200 Pennsylvania Avenue, N.W., Washington, DC 20460 or online at https://www.epa.gov/saferchoice/standard.

6.1.3 FAR. The FAR may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 or online at https://www.acquisition.gov/far.

6.1.4 GHS. The UNECE GHS may be obtained online at http://www.unece.org/trans/danger/publi/ghs/ghs_rev06/06files_e.html.

6.1.5 NAVSEA publications. Copies of T9070-AL-DPC-020/077-2 are available online via Technical Data Management Information System (TDMIS) at https://mercury.tdmis.navy.mil/ by searching for the TMIN without the suffix. Refer questions, inquiries, or problems to: DSN 296-0669, Commercial (805) 228-0669. T9070-AL-DPC-020/077-2 is available for ordering (hard copy) via the Naval Logistics Library https://nll.navsup.navy.mil. For questions regarding the NLL, contact the NLL Customer Service at nllhelpdesk@navy.mil, (866) 817-3130, or (215) 697-2626/DSN 442-2626.

6.2 Ordering data. The contract or order should specify the following:

a. CID document number and revision letter.
b. Quantity required.
c. Product conformance provisions.
d. Packaging requirements.

CONCLUDING MATERIAL
