Page 19, paragraph 6.3.6: Delete and substitute the following:

6.3.6 *Contractor designs.* Contractor designs are designs of inspection equipment for which the Government has assigned design responsibility to the contractor. Contractor designs shall be supported by detailed drawings which depict all information necessary to completely fabricate, calibrate, and operate an item of inspection equipment. This requires that the necessary views, dimensions, materials, finish, notes, operating, and calibration instructions be properly depicted in accordance with approved practices to the extent that further calculation or clarification will not be required. Contractor designs identified as CDCF may be developed on the format the contractor normally employs in his equipment design procedure provided such format reflects the detail and information specified above. Contractor designs identified as CDAF shall comply with the format and requirements of MIL–D–45608, and in addition, contain the detail and information specified above. Final approved contractor designs identified as CDCF shall be suitable for microfilming. They must be nonreproducible diazo or electrostatic prints of top quality full size with black line on white background and shall provide a legible print produced via the 35-MM microfilm process. Contractor shall submit one copy of the final approved design as a rolled set or flat set.
