SUPERSEDING
Int. Fed. Spec. D-B-00350a (GSA-FSS)
June 10, 1957

FEDERAL SPECIFICATION

BILLY, HAND AND GUN, TEAR GAS, (COMBINATION WEAPON)

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope.—This specification covers combination hand billy and tear-gas gun for use by law enforcement officers in subduing unruly persons and for self-protection. The weapon shall be a combination of standard police billy or night stick which composes the barrel chamber to hold and discharge a cartridge or shell loaded with tear gas or a combination of tear and nauseating gas.

1.1.1 *Federal specification coverage.*—Federal specifications do not include all types and classes of the commodity indicated by the titles of the specifications, but cover only those generally used by the Federal Government.

1.2 Classification.

1.2.1 *Types, classes, and caliber gauge.*—The combination weapons shall be of the following types, classes, and gauges:

Type 1.—Blast.
- Class 1.—Medium length (9½ inches to 14 inches).
  - Gauge 10. — For 10-gauge caliber blast cartridge or shell.
  - Gauge 12. — For 12-gauge caliber blast cartridge or shell.
- Class 2.—Long length (20 inches to 24 inches).
  - Gauge 10. — For 10-gauge caliber blast cartridge or shell.
  - Gauge 12. — For 12-gauge caliber blast cartridge or shell.

Type II.—Spray.
- Class 1.—Medium length (9½ inches to 11 inches).
  - Gauge, special.—For special caliber spray cartridge (approximately 0.750 inch).

2. APPLICABLE SPECIFICATIONS, STANDARDS, AND OTHER PUBLICATIONS

2.1 Specifications and standards. — The following specifications and standards, of the issues in effect on date of invitation for bids, form a part of this specification:

Federal Specifications:

D-C-115 — Cartridges, Projectiles, and Shells, Gas and Flare.

Federal Standards:

Fed. Std. No. 102—Preservation, Packaging, and Packing Levels.

Fed. Std. No. 123—Marking for Domestic Shipment (Civilian Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications and Standards as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is

for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles, Seattle, and Washington, D. C.

(Federal Government activities may obtain copies of Federal Specifications and Standards and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL–STD–129 — Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. — The following publication, of the issue in effect on date of invitations for bids, forms a part of this specification:

Consolidated Freight Classification Rules and Container Specifications.

(Application for copies should be addressed to the Consolidated Classification Committee, 202 Chicago Union Station, Chicago 6, Illinois.)

3. REQUIREMENTS

3.1 Design.—The combination weapon shall be of the latest design, convenient to operate and entirely adequate for the purpose intended. All parts subject to wear shall be readily accessible for adjustment or repair.

3.2 Construction. — Construction shall be free from any characteristics or defects that may render the combination weapon unsuitable or inefficient for the purpose intended.

3.2.1 *Material.*—Unless otherwise specified, the material shall be adequate for its intended application.

3.2.2 *Safety devices.*—Each weapon shall be furnished with suitable safety devices of the latest type. Parts which are hazardous to the operator shall be suitably guarded where practical.

3.2.3 *Interchangeability.*—All replaceable parts shall be constructed to definite standards, tolerances, and clearances in order that any such part of a particular type or model may be replaced or adjusted without requiring modification.

3.3 Type I or II combination hand billy and tear-gas gun.—The type I or II combination hand billy and tear-gas gun shall be constructed of corrosion-resisting metal of sufficient strength to withstand the stresses developed in its application, so that no permanent deformation shall result. The weapon shall be provided with a swivel and thong and shall be of shape, size, and weight similar to a standard police billy or night stick. The combination weapon shall be a tear gas gun consisting of a barrel chamber to hold and discharge a cartridge or shell loaded with tear gas or a combination of tear- and nauseating-gas agent. The firing of the weapon shall be accomplished through manual operation and have positive locking devices to prevent accidental discharge. It shall have easy, positive trigger action.

3.3.1 *Type I, blast.* — The type I blast weapon shall discharge gas by a direct blast for minimum distance of 10 feet. The barrel shall be suitable for 10- or 12-gauge caliber blast cartridges or shell, whichever is specified in the invitation to bid, contract, or order.

3.3.2 *Type II, spray.*—The type II spray weapon shall discharge gas directly from muzzle through pressure created in the combustion chamber of the barrel. The barrel shall be suitable for special (approximately 0.750-inch) caliber spray cartridges.

3.3.3 *Cartridge or shell, blast or spray.*—The blast or spray cartridge or shell shall conform to the requirements of Federal Specification D–C–115.

3.4 Finish.—Unless otherwise specified, the external surface finish of the weapon shall be manufacturer's standard.

3.5 Instructions on operation and maintenance.—When specified, the contractor shall furnish instructions on operation and maintenance of weapon (see 6.1).

3.6 Workmanship.—The weapon shall be new and of quality workmanship necessary to produce a weapon of good appearance, stability, and efficient operating and productive characteristics found in first quality commercial items of a similar nature.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 General. — Unless otherwise specified, the weapon and all material entering into the manufacture thereof shall be subject to inspection by authorized Government inspectors. When inspection is conducted at the contractor's plant, all tests required by this specification and/or contract or purchase order shall be conducted by the contractor under the supervision of an authorized Government inspector. The Government inspector may at his option conduct any or all of the tests. The place of inspection and acceptance shall be as specified in the invitation for bids, contract, or purchase order (see 6.1).

4.2 Inspection. — Each weapon shall be given a general inspection for material, workmanship, dimensions, performance, weight, painting, marking, packaging, packing, labeling, and general compliance with the requirements of this specification.

4.3 Tests.—The weapon shall be tested for compliance with the requirements of this specification.

4.4 Retests.—Rejected weapons shall not be resubmitted for inspection without furnishing full particulars concerning previous rejections and measures taken to overcome the defects.

5. PREPARATION FOR DELIVERY

(Nonmilitary agencies.—Federal Standard No. 102 should be referred to for definitions and applications of the various levels of packaging protection for supplies and equipment.)

5.1 Preservation and packaging.

5.1.1 *Level A.*—Level A preservation and packaging shall afford adequate protection against corrosion, deterioration, and physical damage during shipment, handling, indeterminate storage and world-wide redistribution.

5.1.2 *Level C.*—Level C preservation and packaging shall be in accordance with the contractor's commercial practice.

5.2 Packing.

5.2.1 *Level A.*—Level A packing shall afford adequate protection during shipment, handling, indeterminate storage, and world-wide redistribution.

5.2.2 *Level B.*—Level B packing shall afford adequate protection against multiple domestic shipments, handling, and storage.

5.2.3 *Level C.*—Commodities preserved and packaged as specified in 5.1.1 and 5.1.2 shall be packed in a manner to insure carrier acceptance and safe delivery at destination. Containers shall be in accordance with the Consolidated Freight Classification Rules, or regulations of other carriers, or regulations of oceangoing vessels as applicable to the mode of transportation.

5.3 Marking.

5.3.1 *Military requirements.*—On military procurements, interior packages and exterior shipping containers shall be marked in accordance with Military Standard MIL–STD–129.

5.3.2 *Nonmilitary requirements.*—In addition to any special marking specified in the contract or order, each unit and intermediate

package and shipping container shall be marked in accordance with Federal Standard No. 123.

6. NOTES

6.1 Ordering data. — Purchasers should exercise any desired options offered herein, and procurement documents should specify the following (see 3.2.1, 3.4, 3.5, and 4.1).

(*a*) Title, number, and date of this specification.

(*b*) Type, class, and gauge required (see 1.2.1).

(*c*) Color of paint and type of finish, if different (see 3.4).

(*d*) Instructions on operation and maintenance, if required (see 3.5).

(*e*) Specify place of inspection (see 4.1).

(*f*) Specify level of preservation, packaging and packing (see section 5).

(*g*) Special marking, if required (see 5.3).

Notice. — When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.
