Add paragraph 4.3.2 a:

“4.3.2 a. Tool control dimensions. Dimensions marked tool control shall be gaged during first article inspection, and after 250 items are produced from each machine in operation and after any tooling change. Where destruction of components is necessary to inspect these dimensions, measurements of the tool may be substituted provided the contractor has established correlation between the tool dimensions and the component dimensions prior to the start of production. The contractor shall be responsible for maintaining adequate surveillance to assure that drawing requirements are being met throughout the life of the tool. Corrective action will be immediately instituted whenever a defective tool control dimension is found.”

4.3.2.1.1 Delete “Major” 101 and 102, and substitute the following:

“101.	True position primer hole with body	Gage
102.	True position primer hole counterbore with primer hole	Gage”.

The margins of this amendment are marked with an asterisk or vertical line to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
