COMMERCIAL ITEM DESCRIPTION

APRON, LABORATORY, PLASTIC

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-A-41801.

1. CLASSIFICATION

1.1 Classification. This commercial item description covers aprons of the following types:

Type I - Plain
Type II - With pocket and trough

2. SALIENT CHARACTERISTICS

2.1 Design and construction, type I. The apron shall have a bib and tie tapes, approximately 22 inches long by one inch wide. The apron shall be approximately 45 inches long by 29 inches wide. The straight area shall be approximately 35 inches long and shall be so cut that the neckline is approximately 10 inches wide. The apron and tie tapes shall be constructed of clear, colorless, polyvinyl chloride plastic film with a minimum 0.008 inch thickness. The outside perimeter of the apron shall have a 1/2 ± 1/16 inch wide heat sealed hem. The tie tapes shall be heat sealed to the apron at the beginning of the bib and shall be reinforced to the apron with an extra strip of vinyl. The neck shall be heat sealed to the apron at each end of the 10-inch neckline width.

2.2 Design and construction, type II. The type II apron shall have all the characteristics of the type I apron and shall have an additional pocket and trough. The pocket shall be located in the center of the bib area and the trough shall be located at the bottom hem. The top of the pocket shall be approximately 3 inches down from the apron lap, the trough shall be 2-3/4 ± 1/4 inches high by the width of the apron. The pocket and trough shall be constructed of the same material and thickness as the type I apron. The edges of the pocket and trough shall be heat sealed, 1/8 inch minimum width. The pocket shall have a snap fastener. The male and female snap fastener halves shall be reinforced with at least one extra layer of vinyl film where they are attached to the apron and pocket. The male and females halves shall be centered and shall be approximately 1-inch distance from the top of pocket.

3. QUALITY ASSURANCE

FSC 8415

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

3.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4. PACKAGING

4.1 Packaging. Each apron shall be folded in half across the length and then folded in half across the width. The folded apron shall measure approximately 23 by 15 inches. Twenty folded aprons of one type only, shall be neatly stacked in a bundle and securely tied with cotton tape or twine approximately 4 inches from each end.

4.2 Packing. One hundred aprons of one type only shall be packed in a fiberboard shipping container conforming to style RSC-L, type CF, class domestic, variety SW, minimum grade 200 of PPP-B-636. The inside of each shipping container shall be fitted with a box liner conforming to type CF, class weather-resistant, variety DW, grade 275 of PPP-B-636. Aprons, bundled as specified above, shall be packed flat, five in depth within the shipping container. Approximate dimensions of the shipping container shall be 24 inches in length, 16 inches in width, and 8 inches in depth. Each container shall have the contents completely covered on the top and bottom with a sheet of 30 pound minimum basis weight kraft paper conforming to type I, grade B of UU-P-268. Each shipping container shall be closed in accordance with the appendix of PPP-B-636.

4.3 Palletization. When required, aprons shall be palletized on a 4-way entry pallet in accordance with MIL-STD-147. Load type shall be Ia; bonding means shall be K and L, or O, or P and pallet pattern shall be number 3 of MIL-STD-147.

4.4 Marking. In addition to any special markings required by the contract or purchase order, unit packs, shipping containers, and palletized unit loads shall be marked in accordance with MIL-STD-129.

5. NOTES

5.1 Intended use. The aprons are used by military personnel in hospital and dispensary laboratories.

5.2 Ordering data.

a. Title, number, and date of this document.
b. Type of apron required (see 1.1).
c. When palletization is required (see 4.3).
