COMMERCIAL ITEM DESCRIPTION

RACKS, FOOD CONTAINER, MOBILE

The General Services Administration has authorized the use of this commercial item description in preference to Type I, Size 2 of Military Specification MIL-R-43567A(GL).

Intended use.

This commercial item description covers two types of mobile racks to be used in military commissaries.

Type I - Two food container (lugs) capacity

Type II - Six food container (lugs) capacity

Salient characteristics.

Description: The type I food container rack shall carry two containers (lugs) measuring 26 inches long by 15 inches wide by 8 inches deep. The rack frame shall be of welded construction of round or square stainless steel tubing. Four 5-inch diameter swivel casters with a 1 inch minimum hard rubber tread shall be provided with the rack. The dimensions of the type I rack shall be 27 inches wide by 20 inches deep by 34 inches high, and the type II rack shall be 27 inches wide by 20 inches deep by 78 inches high. The racks shall be provided with bumpers so that no component of the rack, except the bumper, touches a vertical wall upon contact.

Tests. With each lug loaded with 100 pounds, the rack shall be capable of being pushed ten times over a 1/4 inch high obstacle without evidence of damage or permanent deformation.

Markings: The rack shall have an identification plate installed and it shall include the manufacturer's model and serial number, contract number and stock number.

Standards compliance: The racks shall comply with National Sanitation Foundation Standards Criteria C-2.

Workmanship.

All workmanship shall conform to good commercial practice.

Quality assurance

The contractor is responsible for assuring that the items furnished to the Government conform to all requirements specified in referenced documents and herein. The contractor shall furnish a certificate of compliance certifying that the items being furnished comply with the stated requirements. The Government reserves the right to inspect the items to verify the certification and may reject any item or lot of items when it is determined that:

a. Any required component or design characteristic is missing or not as specified herein.

b. Any aspects of design, construction, assembly, function or finish is not in accordance with good commercial practice.

c. Packaging, packing and marking is not as specified.

Packaging

A. Commercial packaging. Each rack shall be packaged in accordance with commercial practice.

B. Commercial packing. Each rack shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers (when applicable) shall comply with the National Motor Freight Classification or Uniform Freight Classification, as applicable.

C. Export packaging. Each rack shall have the casters disassembled. The casters shall be packaged in a weather-resistant fiberboard box constructed and closed in accordance with Method IV as specified in PPP-B-636. Each rack shall be cleaned, preserved and cushioned to afford protection against corrosion, deterioration and physical damage during shipment and storage.

D. Export packing. Each rack shall be packed flat in a snug-fitting wood-cleated plywood box conforming to overseas type, style A or J, grade B, type 2 load of PPP-B-601 or nailed wood box conforming to class 2, style 2 or 4, grade B, type 2 load of PPP-B-621. The rack and packaged casters shall be immobilized within the box. Each shipping container shall be closed and strapped in accordance with the appendix of PPP-B-601 or PPP-B-621, as applicable.

E. Marking of interior boxes and shipping containers (commercial and export). Commercial marking for interior boxes and shipping containers is acceptable provided the following information is included:
