COMMERCIAL ITEM DESCRIPTION

WRAPPING MACHINE, MEAT AND PRODUCE, MANUAL

The General Services Administration has authorized the use of this commercial item description.

1. Intended use. This commercial item description covers a wrapping machine used for stretch packaging and sealing meat and produce items with vinyl film wrap.

2. Salient characteristics.

2.1 Design and construction. The wrapping machine shall be a console model consisting of: two side platter shelves, a wrapping platform, a wrap sealing plate, and a thermostatically controlled low temperature film cutting rod. The machine shall have a three film wrap roll capacity to accommodate rolls of wrapping film up to 18 inches wide with a 3-inch minimum diameter core. The roll holders shall each have a thumb screw insert for easy loading without the use of tools and the holders shall each have a spring loaded brake. The machine shall be equipped with an adjustable height lever. The wrapping machine shall be constructed of stainless steel and shall have a 1-inch minimum tubular or square steel framework.

2.2 Dimensions. The maximum dimensions of the wrapping machine shall be 48 inches wide by 26 inches deep by 39 inches high.

2.3 Electrical. The wrapping machine shall be capable of operating on 120 volts, 60 Hertz, single phase domestically and 220 volts, 50 Hertz, single phase for overseas operations. The wrap sealing plate shall have a 500-watt minimum operating capacity.

3. Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.
