MILITARY SPECIFICATION

MINE, ANTITANK, PRACTICE: M79 ASSEMBLING AND PACKING

This Specification is approved for use by the US Army Armament, Munitions and Chemical Command, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification contains requirements not normally covered by the drawings, and provides quality assurance provisions for the fabrication of parts, assembling, and packing for one type of mine designated as Mine, Antitank, Practice: M79.

2. APPLICABLE DOCUMENTS

2.1 Government documents.

2.1.1 Specifications and standards. Unless otherwise specified, the following specifications and standards of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISˆ) specified in the solicitation, form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

TT-C-490B - Cleaning Methods and Pretreatment of Ferrous Surfaces for Organic Coatings.

MILITARY

MIL-A-48078 - Ammunition, Standard Quality Asssurance Provisions, General Specification For.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, US Army Armament Research and Development Center, Attn: AMSMC-QA, Dover, New Jersey 07801-5001 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

FSC 1345

Check the source to verify that this is the current and approved version.

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspections By Attributes.

2.1.2 Other Government documents, drawings, and publications. The following other Government documents, drawings, and publications form a part of this specification to the extent specified herein.

DRAWINGS

US ARMY ARMAMENT RESEARCH AND DEVELOPMENT CENTER

9243805 - Pkg & Mkg for Shipping & Storage Container, Mine for Mine, AT: HE, M75; Mine, AP: HE, M74 or Mine, AT, Practice: M79 in Container, Ammo, Plastics: PA-83.
9317994 - Mine, Antitank, Practice: M79.
9333791 - Pkg for Plastic Ammunition Container: PA-83, for Mine, AP: HE, M74 or Mine, AT, Practice: M79.

US ARMY MATERIAL DEVELOPMEMT AND READINESS COMMAND

19-48-4116/95M-20PA 1002 - Unitization Procedures for Boxed Ammunition and Components on 4-WAY ENTRY PALLETS.

(Copies of specifications, standards, drawings, and publications required by manufacturers in connection with specification procurement functions should be obtained from the procuring office or as directed by the contracting officer.)

2.1.3 Other publications. The following documents forms a part of this specification to the extent specified herein. Unless otherwise specified, the issues of the documents which are DOD adopted shall be those listed in the issue of the DODISS specified in the solicitation. Unless otherwise specified, the issues of documents not listed in th DODISS shall be the issue of the nongovernment documents which is current on the date of the solicitation.

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

ASTM-D-3951 - Commercial Packaging.

(Application for copies of ASTM publications should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pennsylvania 19103)

2.2 Order of precedence. In the event of a conflict between the text of this specification and the references cited herein, the text of this specification shall take precedence.

3. REQUIREMENTS

3.1 Materials. Materials shall be in accordance with the applicable drawings, specifications and standards.

3.2 Assembly. The assembly shall comply with all requirements specified on Drawing (Dwg.) 9317994 and all associated drawings and with all requirements specified in applicable specifications and standards.

3.3 Forty-foot drop test. The practice mine shall show no evidence of broken, cracked, or loose parts which will render it unusable, after being dropped from a height of forty (40) feet (ft) as specified on Dwg. 9317994 and in 4.5.1.

3.3.1. Paint adhesion test. The painted practice mine tested in 4.5.2 shall show no removal of the coating by the adhesive tape.

3.3.2. Salt spray test. The painted practice mine tested as in 4.5.3 and examined immediately after removal from the salt spray test shall show no more than a trace of rusting (No. 9-1 Method 6451 of FED-STD-141) and no more than five scattered blisters none larger than 1 mm in diameter. On removal of the paint there shall be no more than a trace of rusting, pitting,or corrosion of the steel.

3.4 First article inspection. This specification contains technical provisions for First Article Inspection. Requirements for submission of First Article Samples by the contractor shall be as specified in the contract.

3.5 Workmanship. All parts and assemblies shall be fabricated and assembled in a thorough, workmanlike manner, and all manufacturing, processing, and assembling operations shall be correctly performed. All parts and assemblies shall be clean, free of burrs, sharp edges, cracks, dirt, grease, rust and other foreign matter that may impair proper functioning. The cleaning

Check the source to verify that this is the current version before use.

method used shall not be injurious to any parts, nor shall the parts be contaminated by the cleaning agents. Exterior surface coatings shall be continuous; however a few light scratches not exposing base material may be permitted. All required markings and stampings shall be neat and sharply defined. Required packing shall be dry.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection and standard quality assurance provisions. Unless otherwise specified herein or in the contract, the provisions of MIL-A-48078 shall apply and are hereby made a part of this detail specification.

4.2 Classification of inspections. The following types of inspection shall be conducted on this item.

a. First article inspection (see 4.3).

b. Quality conformance inspection (see 4.4).

4.3 First article inspection.

4.3.1 Submission. The contractor shall submit a first article sample as designated by the contracting officer for evaluation in accordance with provisions of 4.3.2. The first article sample shall consist of the following items in the quantities as indicated.

PART DESCRIPTION	DRAWINGS	QUANTITY
Mine, Antitank, Practice: M79	9317994	15

4.3.2 Inspections to be performed. See MIL-A-48078 and Table I as specified herein.

4.3.3 Rejection. See MIL-A-48078.

4.4.3 Testing. Testing is described in the First Article and Quality Conformance Inspection Tables.

4.4.4 Inspection equipment. The inspection equipment required to perform the examinations and tests prescribed herein is described in the "Paragraph Reference/Inspection Method" column in the tables starting with paragraph 4.4.2.1. The contractor shall submit for approval inspection equipment designs in accordance with the terms of the contract. See Section 6 of MIL-A-48078 and 6. herein.

4.5 Methods of inspection.

4.5.1 Forty-foot drop test. A sample of eight (8) practice mines shall be randomly selected and subjected to the forty-foot drop test. Orientation of each end, for the ten drops per end (20 drops total), shall be random. The angle of mine at impact shall be approximately 45° and the drop shall be made onto a 1 inch steel plate. Observation shall be made for compliance with Dwg. 9317994 and the requirement of 3.3.

4.5.2 Paint adhesion test. This test shall be performed as specified in TT-C-490B.

4.5.3 Salt spray test. This test shall be performed as specified in TT-C-490B.

5. PACKAGING

5.1 Preservation and packaging.

5.1.1 Level A. The mines shall be preserved and packaged in accordance with Dwg. 9333791.

5.2 Packing.

5.2.1 Level A. Packing shall be in accordance with Dwg. 9243805.

5.3 Marking.

5.3.1 Level A. Marking shall be in accordance with Dwgs. 9333791 and 9243805.

Source: https://assist.dla.mil -- Downloaded: 2026-10-22T19:34Z
Check the source to verify that this is the current version before use.

5.4 Unitization.

5.4.1 Level A. Unitization of mines as packed in 5.2.1 shall be in accordance with Dwg. 19-48-4116/95M-20PA1002 (DARCOM Ammo Center).

6. NOTES

6.1 Intended use. The Mine, Antitank, Practice: M79 is intended to be used to simulate the M74 and M75 Mines in loading and launching drills from the M128 Mine Dispenser.

6.2 Ordering data. See MIL-A-48078.

6.3 Submission of inspection equipment design for approvals. (See MIL-A-48078.) Submit equipment designs as required to Commander, US Army Armament Research and Development Center, ATTN: AMSMC-QAT-I(D), Dover, New Jersey 07801-5001.

6.4 Distribution of ammunition data cards, inspection and test results. Distribution of data cards, inspection, and test results shall include the following: Commander, US Army Armament Research and Development Center, ATTN: AMSMC-QAT-M(D), Dover, New Jersey 07801-5001.

6.5 Drawings. Drawings listed in Section 2 of this specification under the heading US Army Armament Research and Development Center (ARDC) may also include drawings prepared by, and identified as Edgewood Arsenal, Frankford Arsenal, Rock Island Arsenal, ARRADCOM, or Picatinny Arsenal drawings. Technical data originally prepared by these activities is now under the cognizance of ARDC.
