Add 5.4 as follows:

"5.4 Palletization. The nose body assemblies, packed in suitable containers, shall be palletized to facilitate handling. Pallets and palletized loads shall be in compliance with applicable transportation rules and regulations. Loaded pallet weights shall not exceed the weight limitations of the respective type pallet utilized, with a limit of 2000 pounds gross weight for any type pallets, and a minimum quantity of 400 items per pallet. The pallet shall be loaded and the contents secured thereon in a manner that will insure the security of the load under routine shipping conditions."
