COMMERCIAL ITEM DESCRIPTION

DIMMER, LAMP, MEDIUM SCREW BASE AND SOCKET, IN-LINE SOCKET

The General Services Administration has authorized the use of this commercial item description by all federal agencies.

1. SCOPE. This commercial item description (CID) covers in-line socket style lamp dimmers with a medium screw base and socket to be used in dimming 120-volt, 60-hertz incandescent lamps rated at 150 watts maximum. These dimmers are installed in-line between the incandescent lamp bulb and the lamp socket.

2. CLASSIFICATION. The dimmers shall be of the following types and colors. The type and color to be furnished shall be as specified (see 7.3 (a)).

2.1 Type I – Incremental control
Type II – Infinitely variable control

2.2 Color A – Beige
Color B – Black

3. SALIENT CHARACTERISTICS

3.1 General requirements. The dimmer shall be rated at 150 watts for use on a 120-volt, single-phase, 60-hertz circuit. The dimmer shall conform to Underwriters Laboratory (UL) 20, “UL Standard for Safety for General-Use Snap Switches”. The dimmer shall be capable of operating with a portable generator system having a floating ground.

Comments, suggestions, or questions on this document should be addressed to Defense Supply Center Philadelphia, ATTN: DSCP-NASA, 700 Robbins Avenue, Philadelphia, PA 19111-5096 or email to dscpg&inspecomments@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at http://assist.daps.dla.mil.

Check the source to verify that this is the current version before use.

3.2 Body. The dimmer shall have a molded thermoplastic body that house a switch and control circuitry with external medium base thread located on one end and internal medium base thread only (see figure 1) or internal medium base thread plus external UNO thread (see figure 2) located on the opposite end.

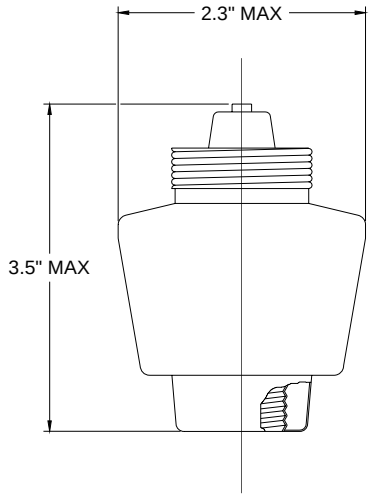

FIGURE 1. LAMP DIMMER

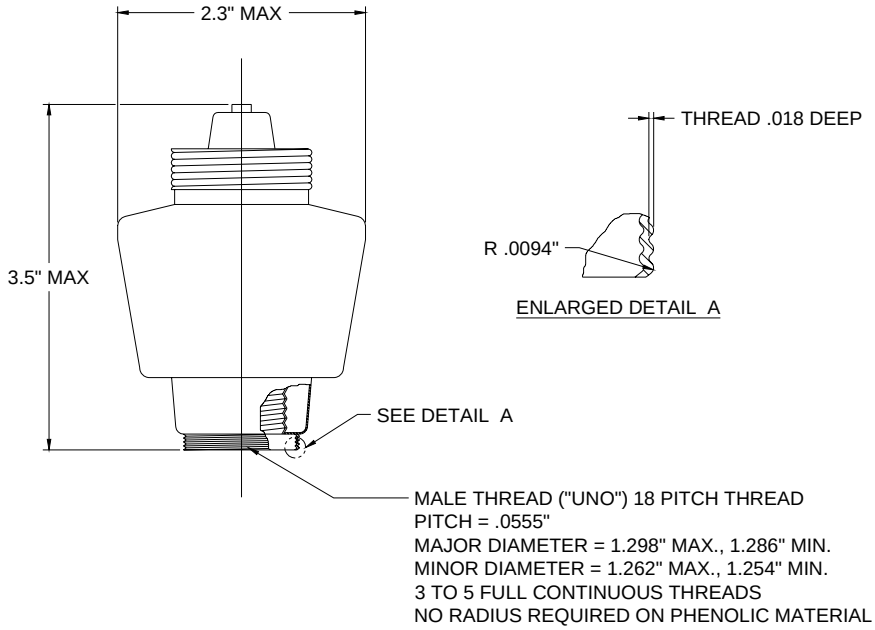

FIGURE 2. LAMP DIMMER WITH UNO THREAD.

3.3 Threads. The external medium base screw threads shall conform to American National Standards Institute (ANSI) C81.61, “Electrical Lamp Bases Specifications for bases (Caps) for electric Lamps”, and the internal medium base screw thread shall conform to ANSI C81.62, “Electric Lampholders”. UNO external thread shall be as specified in figure 2.

3.4 Control circuitry. The dimmer shall be provided with an on/off switch and solid state control circuitry for brightness level control. Type I dimmers shall provide three levels of brightness control. Type II dimmers shall provide infinitely variable brightness level control from maximum brightness to off.

3.5 Dimensions. The dimmer shall not exceed a diameter of 2.3 inches and a length of 3.5 inches.

4. REGULARTORY REQUIREMENTS

4.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description; conform to the producer's own drawings, specifications, standards, and quality assurance practices; and be the same product as that which the supplier offers for sale on the commercial market. The government reserves the right to require proof of such conformance.

5.1.1 Verification of conformance. Suitable verification of conformance to UL 20 shall be either the UL label on the product or certification of such conformance by an accredited testing laboratory satisfactory to the Government.

5.2 Bid samples. Two bid samples shall be provided unless otherwise specified in the contract or purchase order.

5.3 Warranty. Unless otherwise specified (see 7.3 (b)), the manufacturer's standard commercial warranty, terms, and conditions shall apply.

6. PACKAGING

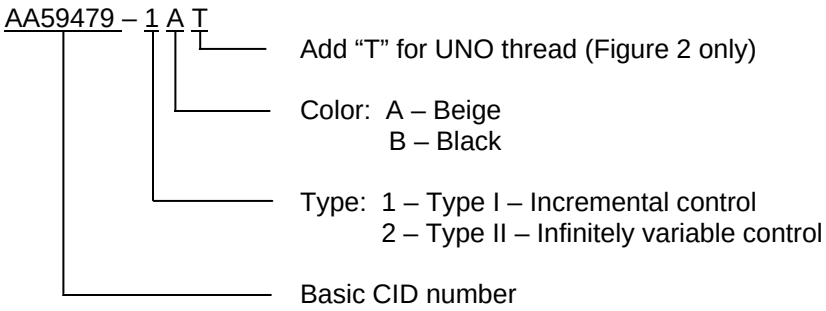
6.1 Preservation, packing, and marking. For acquisition purposes, the products shall be preserved, packed, and marked as specified in the acquisition order (see 7.3 (c)).

6.1.1 Commercial. In the absence of detailed instructions in the contract or purchase order preservation and packing shall be in accordance with American Society for Testing and Materials (ASTM) D3951, "Standard Practice for Commercial Packaging".

7. NOTES

7.1 Part identification number (PIN). The following PIN procedure is used for government purposes and does not constitute a requirement for the contractor.

This example describes a part numbering system for CID A-A-59479:



7.2 Sources of documents.

7.2.1 FAR. The FAR may be obtained from the Regulatory Secretariat, 1800 F Street NW, Washington, DC 20405 or online at http://www.acqnet.gov.

Check the source to verify that this is the current version before use.

7.2.2 ANSI standards. Copies of ANSI standards may be obtained from the American National Standards Institute, Attn: Customer Service, 25 West 43rd Street, New York, NY 10036 or online at www.ansi.org.

7.2.3 ASTM standards. Copies of ASTM standards may be obtained from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959 or online at www.astm.org.

7.2.4 UL standards. Copies of UL standards may be obtained from Underwriters Laboratories Inc., 333 Pfingsten Road, Northbrook, IL 60062 or online at www.ul.com.

7.3 Ordering data. The contract or order should specify the following:

a. CID document number, revision, and CID's PIN.
b. Warranty, if different (see 5.3).
c. Specify packaging requirements (see 6.1).

7.4 Subject terms (keyword listing).

Dimmer
Switch
Lamp

7.5 Changes from previous issue. Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extent of the changes.
