10. PREPARATION INSTRUCTIONS

10.1 Contract. This data item is generated by the contract which contains a specific and discrete work task to develop this data product.

10.2 Format and content.

10.2.1 The chart shall be on 8-1/2 x 11 graph paper with a 20 x 20 per inch matrix or metric A4 with a 2.5 2.5 cm matrix to be furnished by the contractor. A convenient scale will be chosen to depict the man hours expended on the vertical axis and the projected time of the contract on the horizontal axis. A broken line will be plotted to depict the number of man hours estimated to accomplish the effort. The estimated number of man hours depicted on this chart should agree with the estimated number of man hours depicted on other technical data items called out under this contract for the same work effort. A solid line will be plotted to depict the actual man hours expended on the contract during the prescribed period.

10.2.2 Revised estimate lines will be constructed on the chart by the contractor when contract modification causes the original estimate to be no longer suitable for the intended purpose.

10.2.3 Whenever substantial variance from original estimates can be anticipated, the contracting officer or his duly authorized representative shall be advised promptly.

10.3 The chart shall be a reproducible master and shall remain in the possession of the contractor during the life of the contract.
