DTIC Applicable:
GIDEP Applicable:
Office of Primary Responsibility: N/PMS377
Applicable Forms: N/A
Use/Relationship: A Test Change Proposal (TCP) is used to propose changes to approved test documents including test outlines, test procedures, test sequence networks, test indices, and test schedules. Test changes to approved test documents can only be made using a TCP. TCPs are used anytime prior to the start of test conduct and may be written to propose multiple changes to the same test document or similar changes to multiple documents. The TCP supports the problem reporting requirements of the Craft Test Status Report.

a. This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task required as delineated in the contract.

Requirements:

1. Format. The format and content of the TCP shall be presented similar to that shown in Figure 1.

End of DI-MISC-81621.
