NO SUPERSEDING STANDARD

MATERIAL: ...ide. The cover ... The housing ...

DESIGN: Th... ...x21x203 cm high with the cover in ... ...e cover are 34 mm diameter and 34 mm hig... ... shall have a universal motor, with sealed, self... ...ed at 20,000 rpm, which is designed for intermittent opera... ...or shall be protected by a manual reset thermal overload circu... ...er. A push-button on-off switch shall be mounted on the front of the housing. Dust-tight felt gasket shall be between motor and grinding chamber for protecting the motor. The chamber cover shall be secured to housing by latching spring clips. The unit shall have a three wire cord and grounded plug for 120 volts, 60 Hz, 75 watts power. The electrical wiring shall conform to all the requirements of the Underwriters Laboratories, Code Number UL73. Grinding chamber may be cooled by circulation of water through the coil around the chamber. Nozzles protruding from rear of mill take 1/4 inch I.D. tubing.

USE: The mill is used for grinding dry material down to 125 µm particle size. Performs best with brittle or easily shreddable material. Ground product is not uniform in size. Maximum charge approximately 50 grams.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
