# COMMERCIAL ITEM DESCRIPTION

## MODEL, ANATOMICAL, Torso and Head

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers a life size anatomical model of the human torso and head.

Salient characteristics.

The model shall be a life size anatomical model of the human head and torso. The model shall consist of a life size muscular torso, including the head and sexless genital organs. Deep muscles shall be visible and dissected on one side and the superficial musculature or lymph glands and ducts visible on the opposite side. The torso shall be mounted on a turnable base.

The model shall be considered as a combination unit and shall be dissectable into a minimum of 26 parts. The minimum number of major dissections shall be as follows:

a. The head, showing details of the brain, orbit, nasal cartilages, bony structures, blood vessels, nerves, etc.

b. The back, showing the thoracic cage and vertebrae.

c. The lungs.

d. The ribs.

e. The heart.

f. The abdominal cavity showing stomach, liver, small intestine, transverse colon, rectum, kidney, blood vessels, etc.

g. The pelvic cavity.

h. The male genital organs insert, the female insert, and the sexless genital part insert.

AMSC/NA FSC 6910

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

The parts of the anatomy shall be number coded. There shall be no less than 604 coded structures.

The model shall be fabricated of suitable plastic with density varying appropriately with simulated human tissue of the organs and structures represented. The basic resins from which all parts of the model are fabricated shall be pigmented with colors to simulate human tissues. The coloring of anatomical detail and shaded tones may be done with vinyl base paints or permanent vinyl inks, where necessary, to indicate specific structures.

The model shall be provided with a suitable protective cover and an instruction manual. The instruction manual shall completely describe the anatomical model and all coded parts.

Workmanship. The model shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One model, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specification, standard, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

| NSN | ITEM IDENTIFICATION |
|---|---|
| 6910-00-299-8626 | MODEL, ANATOMICAL, Torso and Head |

Ordering data. Intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order.
