MILITARY SPECIFICATION

ROD, EARTH, BLAST-DRIVEN, M13

1. SCOPE

1.1 This specification covers Blast-Driven Earth Rod, M13, intended for use in making holes in the earth suitable for containing blasting charges.

2. APPLICABLE SPECIFICATIONS, STANDARDS, DRAWINGS, AND PUBLICATIONS

2.1 The following specifications, drawing and publication, and all drawings and specifications referenced thereon, of the issue in effect on date of invitation for bids, form a part of this specification:

SPECIFICATIONS

MILITARY

MIL-G-2550—General Specification For Ammunition Except Small Arms Ammunition.

MIL-R-11471—Radiographic Examination of Metals.

DRAWINGS

ORDNANCE CORPS

82-13-14—Rod, Earth, Blast-Driven, M13 Assembly and Details.

PUBLICATIONS

ORDNANCE CORPS

ORD-SIP-M6-322—Rod, Earth, Blast-Driven, M13 Parts For.

(Copes of specifications, drawings and publications required by contractors in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 **Material.**—Materials and parts shall be in accordance with applicable drawings and specifications.

3.2 The assembly shall comply with all requirements specified on the drawings and in applicable specifications.

3.3 **Firing chamber.**

3.3.1 *Proof-firing.*—Each firing chamber shall withstand proof-testing, without evidence of permanent set or deformation in excess of drawing dimensions when tested as specified in 4.3.1.

3.3.2 *X-ray.*—Each firing chamber, after proof-firing, shall show no evidence of defects when subjected to X-ray examination in accordance with 4.4.

3.4 **Workmanship.**—All parts shall be free of chips, dirt, grease, rust and other foreign material. The cleaning method used shall not be injurious to any of the parts nor shall the parts be contaminated by the cleaning agents used.

4. SAMPLING, INSPECTION, AND TEST PROCEDURE

4.1 **Lot.**—A lot shall consist of all assemblies manufactured by one manufacturer in one unchanged process, in accordance with the same drawing, same drawing revision, same specification and same specification revision.

4.2 **Inspection.**—Inspection shall be as specified in Specification MIL-G-2550 and Standard Inspection Procedure ORD-SIP-M6-322.

4.3 **Proof-firing test.**—Each firing chamber in the lot shall be tested by proof-firing. Necessary propelling charges will be furnished by the bureau or agency concerned. Each firing-chamber during this test shall be completely filled with clay above the propellant. Physical dimensions of the firing chamber shall be checked before and after proof-firing. If any firing chamber shows evidence of permanent set or deformation in excess of drawing dimensions, it shall be rejected.

4.4 Radiographic examination.—Each firing chamber, after proof testing shall be subjected to radiographic examination by X-rays in accordance with method specified in Specification MIL-R-11471. Evidence of defects in the metal shall be cause for rejection of the firing chamber. Upon completion of the proof-firing test and radiographic inspection, each firing chamber shall be cleaned and the protective finish applied as specified on the applicable drawing.

5. PREPARATION FOR DELIVERY

5.1 Packaging, packing, labeling and marking.—Packaging, packing, labeling and marking shall be as specified on the applicable drawing.

5.2 Data cards.—Data card information shall be as specified in Specification MIL-G-2550.

6. NOTES

6.1 (Not applicable)

Notice.—This specification together with specifications and drawings pertaining to it and bearing a "Notice" of similar restrictions is intended for use only in connection with procurement by the United States Government, and shall not be reproduced either wholly or in part except when authorized in connection with Government procurement, nor be used for any other purpose except when specifically authorized by the Chief of Ordnance.
