COMMERCIAL ITEM DESCRIPTION

LADLE, KITCHEN

The General Services Administration has authorized the use of this commercial item description for all Federal agencies.

1. SCOPE

1.1 Scope. This commercial item description (cid) covers corrosion-resisting steel ladles for use in kitchens.

2. CLASSIFICATION

2.1 Classification. The ladles shall be of the following sizes, as specified (see 7.2).

Size 1 - 2 ounce (59 ml) capacity
Size 2 - 4 ounce (118 ml) capacity
Size 3 - 8 ounce (236 ml) capacity
Size 4 - 12 ounce (355 ml) capacity
Size 5 - 72 ounce (2.13 l) capacity

3. SALIENT CHARACTERISTICS

3.1 Material. The ladles shall be formed from corrosion-resisting steel conforming to a type 300 series in accordance with ASTM A 167.

3.2 Construction. The ladles shall conform to the dimensions listed in table I and shown on figure 1. Capacity tolerances shall be +15%, -10%. The ladles shall be constructed using one of the following methods:

Method 1 - The complete ladle shall be constructed from one piece of corrosion-resisting steel with no seams.

Method 2 - The ladle body shall be formed from a single piece of corrosion-resisting steel. The handle shall be spot or fillet welded to the body. When the body and handle are secured by fillet welding, the welding rod shall have the same chemical composition as the welded material. When the handle is spot welded to the body, the weld joint shall be completely sealed with non-toxic solder to prevent food accumulation.

3.3 Finish. The ladles shall be cleaned and polished to a No. 3 or better finish as defined by the American Iron and Steel Institute's Handbook, "Finishes for Stainless Steel".

3.4 Marking. The ladles shall be marked with the manufacturer's name, trade name, or trademark of such known character that the source may be readily determined.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

Distribution Statement A: Approved for public release; distribution is unlimited.

FSC 7330

Table I - Dimensions

Size	A	B	C	D	Minimum Thickness Body	Minimum Thickness Handle
1	12 ± 1 (30.5cm)	1 (2.5cm)	5/8 (1.6cm)	1/2 (1.3cm)	0.028 (0.7mm)	0.078 (2.0mm)
2	14 ± 2 (35.6cm)	1-1/4 (3.2cm)	5/8 (1.6cm)	1/2 (1.3cm)	0.031 (0.8mm)	0.078 (2.0mm)
3	16 ± 2 (40.6cm)	1-1/4 (3.2cm)	5/8 (1.6cm)	5/8 (1.6cm)	0.031 (0.8mm)	0.078 (2.0mm)
4	17 ± 2 (43.2cm)	1-1/4 (3.2cm)	5/8 (1.6cm)	5/8 (1.6cm)	0.040 (1.0mm)	0.092 (2.3mm)
5	20 ± 3 (50.8cm)	1-1/4 (3.2cm)	5/8 (1.6cm)	1 (2.5cm)	0.040 (1.0mm)	0.109 (2.8mm)

Notes: 1. All dimensions are inches unless otherwise stated.
2. Tolerances: B - ±1/4, C - +1/2, -1/8, D - +3/16, -1/8
3. Body thickness may be verified at random points within the bowl except for the rim and within 1/4 inch of the rim.
4. Handle thickness may be verified at random points along the handle except for the curved portion.

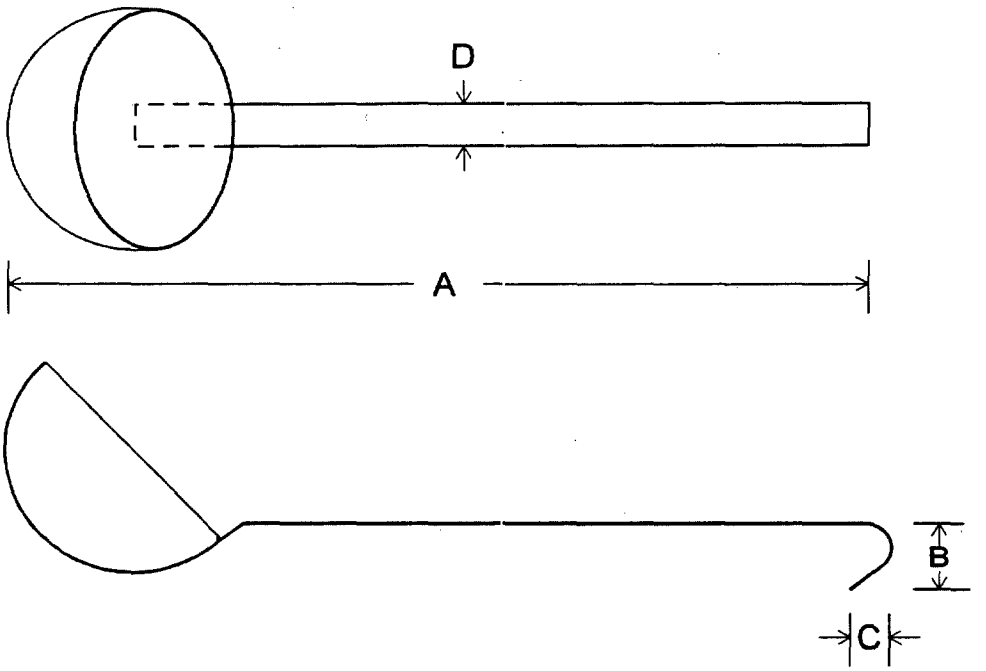

FIGURE 1 - LADLE

3.5 Workmanship. The ladles shall be clean and free from dirt, rough or sharp edges, slivers, burrs, deep scratches, tool marks, or other defects which may affect appearance or serviceability. The finished ladles shall not be fractured, buckled, dented, punctured or otherwise malformed or damaged. Soldered joints shall be as smooth as the metals joined, free from pinholes, cracks, flux deposits or irregularities.

3.6 Standard compliance. The ladles shall comply with the requirments of NSF International Criteria C-2 or Standard No. 2.

3.7 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

3.8 Standard commercial product. The ladles shall, as a minimum, be in accordance with the requirements of this CID and shall be the manufacturer's standard commercial product. A standard commercial product is a product which has been sold or is currently offered for sale on the commercial market through advertisements, manufacturer's catalogs, or brochures, and represents the latest production model.

4. REGULATORY REQUIREMENTS

4.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

5.2 NSF International compliance. The contractor shall submit to the contracting officer or authorized representative, prior to awarding of contract, satisfactory evidence that the items offered meet the requirements of NSF International Criteria C-2 or Standard No. 2. Satisfactory evidence of this compliance may be any of the following:

(1) Listing in the current edition of the "NSF International Listing Food Service Equipment and Related Products, Components and Materials", and display of the NSF International mark on the finished item; or

(2) Certification issued by NSF International under their special contract evaluation/certification program for government contracts; or

(3) Certified test report from a recognized independent testing laboratory acceptable to the medical authority of the service for which the item(s) are being procured stating that the item has been tested and conforms to NSF International Criteria C-2 or Standard No. 2.

6. PACKAGING

6.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.

7. NOTES

7.1 Sources of non-Government association documents.

American Iron and Steel Institute handbooks are available from the Committee of Stainless Steel Producers, American Iron and Steel Institute, 1000 16th Street, N.W., Washington, DC 20036.

ASTM standards are available from the American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959.

NSF International standards are available from NSF International, P.O. Box 130140, Ann Arbor, MI 48113-0140.

7.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. Size required.
c. Preservation, packing, and marking desired.

7.3 Part Numbering. The following part identification numbering procedure is for government purposes and does not constitute a requirement for the contractor.

```
AA1956-1      (AA19561)  Example - Size 1 Ladle
   |    |
   |    |--- Size (1, 2, 3, 4, or 5)
   |--- CID number
```

7.4 National Stock Number (NSN): The following is a list of NSN's assigned which correspond to this CID. The list may not be indicative of all possible NSN's associated with the CID.

NSN	Size No.	Ounce Capacity
7330-00-254-4793	1	2
7330-00-680-0865	2	4
7330-00-248-1153	3	8
7330-00-685-5330	4	12
7330-00-153-9759	5	72
