COMMERCIAL ITEM DESCRIPTION
FILE FOLDERS, DRAWER
(CHARGE-OUT)

The General Services Administration has authorized the use of this commercial item description by all Federal Agencies which replaces Federal Specification UU-F-1206 that has been canceled.

1. **Scope:** This Commercial Item Description covers charge-out file folders which can be used as an out guide or as a holding folder until file is complete.

2. **Salient Characteristics:**

2.1 Material. The folders shall be made from fibrous cellulose materials, conforming to the physical properties listed in table I, and the test criteria specified in table II.

2.1.1 Paperboard. The paperboard used to make the grade as specified in this commercial item description shall be made of fibrous cellulose material. The materials used for the grade shall be Natural Kraft or Manila (Grade A) - Standard Duty, .011 point (min) as specified in the contract or ordering document.

2.1.2 Grain. The grain of the paperboard shall be parallel to the short side of the folder when held in its closed position, when tested as specified in accordance with table II.

2.2 Construction.

2.2.1 The folders shall be formed by folding the board to form a front and back leaf. The dimensions on the front and back leaf shall be as specified in this commercial item description, the ordering document, or contract for the applicable size as specified in figure 1.

2.4 Dimensions.

2.4.1 Front & Back Leafs. The front leaf shall measure 238.13 mm x 298.45 mm (9 3/8 inches x 11 3/4 inches) non-cutout section and 225.43 mm x 298.45 mm (8 7/8 inches x 11 3/4 inches) (cutout) section in front of the tab. The back leaf shall measure 254.0 mm 298.45 mm (10 x 11 3/4 inches) including tab.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278.

2.4.2 Printing. There shall be a red block 12.7 mm ± 1.59 mm (1/2 ± 1/16 inch) high and 50.8 mm ± 1.59 mm (2 ± 1/16 inches) wide printed on the tab surrounding the "OUT" which shall appear in manila (un-printed) letters 9.53 mm ± 1.59 mm (3/8 ± 1/16 inch) high. The front leaf shall be printed in red. Printing shall start 19.050 mm ± 1.59 mm (3/4 ± 1/16 inch) from the top.

2.4.3 Self Tab. The tab shall be a vertical extension of the back leaf. The tab shall be 1/5 cut self tab, 12.7 mm ± 1.59 mm (1/2 ± 1/16 inch) high centered 9.53 mm ± 1.59 mm (3/8 ± 1/16 inch) to the right. The tab corners shall be rounded.

2.4.4 Punching. When punching is required, file folders shall be furnished with punched holes. The contract or purchase order shall specify location and dimensions of punched holes.

3. Regulatory Requirements: The contractor shall certify that the minimum content standard shall be no less than 20% Postconsumer fiber as defined by the Paper Products Recovered Materials Advisory Notice (Paper RMAN) and the Executive Order 12995 dated March 25, 1996. The Paper RMAN is found in the Federal Register, Vol. 61, Part IV dated May 29, 1996.

3.1 Labeling of Recycled Content. The recycled content shall be marked on the product or unit pack.

3.2 Bleaching: In accordance with the performance standards of this commercial item description, a chemical bleaching process may be used. When specified in the ordering data, the bleaching process shall not include the use of chlorine, chlorine dioxide, or other chlorine compounds. The Government reserves the right to require proof of such conformance, prior to first delivery, and thereafter as may be otherwise provided for under the provisions of the contract.

4. Quality Assurance Provisions:

4.1 Product Conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards and quality assurance practices and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

4.1.1 Testing. Testing shall be conducted in accordance with the referenced tests in this Commercial Item Description. (Note: See TAPPI T 400 for specific sampling instructions and acceptance criteria).

5. Packaging:

5.1 The packaging, packing, marking and palletization criteria shall be as specified in the contract or ordering document.

6. Notes:

6.1 Source of Documents. The following documents form a part of this Commercial Item Description to the extent specified herein. Unless otherwise indicated, the issue in effect on the date of invitation for bids or request for proposal shall apply:

6.1.1 Technical Association of the Pulp and Paper Industry (TAPPI) test methods cited in this CID may be obtained from TAPPI, Technology Park, PO Box 105113, Atlanta, Georgia, 30348-5113.

6.1.2 The Final (Paper RMAN) is available from the Environmental Protection Agency's public access server on the Internet or from the RCRA Hotline. The Hotline can be reached toll-free at (800) 424-9346.

6.1.3 Copies of Executive Order 12995 may be obtained from the White House Publications Office, New Executive Office Building, White House, Att: Publications, Washington, DC 20500 202-395-7332.

6.2 Ordering Data: Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

A - Title, number and date of this specification.
B - Height & Width of leaves, if required.
C - Whether bleaching without use of chlorine, chlorine dioxide, or chlorine compound is required.

6.3 National Stock Number Listing (NSN's). The following is a list of nsn's assigned which correspond to this CID. The list may not be indicative of all possible nsn's associated with the CID.
