COMMERCIAL ITEM DESCRIPTION

SOAP, TOILET (LIQUID AND PASTE)

The General Services Administration has authorized the use of this commercial item description as a replacement for Federal Specification P-S-624J, for all federal agencies.

1. Scope. This commercial item description covers commercially available liquid and paste toilet soaps for use in liquid soap dispensers.

2. Classification. Toilet soap shall be of the following types:

Type I - Liquid
Type II - Paste (concentrate/requires dilution)

3. Salient Characteristics:

3.1 Physical/chemical requirements. Toilet soaps shall conform to the requirements of Table I.

TABLE I. Physical and chemical requirements.

Property	Type I Min	Type I Max	Type II Min	Type II Max	ASTM D 460 Test Section
Anhydrous soap (as potash soap, percent)	15.0	---	52.0	---	21 - 22
Free alkali (as KOH, percent)	---	0.05	---	0.2	27 - 29
Free acid (as oleic acid, percent)	---	1.0	---	1.5	18
Matter insoluble in water, percent	---	0.1	---	0.2	19

Beneficial comments, recommendations, additions, deletions, clarification, etc., and any data which may improve this document, should be sent to: GSA, Paints and Chemicals Center, 400 15th Street, S.W., Auburn, WA 98001.

TABLE I (continued)

Property	Type I Min	Type I Max	Type II Min	Type II Max	ASTM D 460 Test Section
Unsaponified plus unsaponifiable matter, percent	---	0.6	---	2.4	30 - 32
Acid number (mg KOH/g fatty acids)	215	---	215	---	45 - 46

NOTE: The contractor may use his normal quality assurance procedures for manufacture of this product; however, should a disagreement arise between the Government and its customer or between the Government and the manufacturer concerning compliance to the salient characteristics of this commercial item description, the test methods and tests stated in this commercial item description will be used to determine compliance of the product.

3.2 Finished product. Type I liquid toilet soap shall be a uniform solution. Type II paste toilet soap shall be a firm, uniform gel. The toilet soaps shall be mildly perfumed.

3.3 Dilution. The manufacturer shall provide, on the product label, the correct water to concentrate dilution ratio to prepare the Type II paste toilet soap to be used in a soap dispenser. Type I liquid toilet soap shall be ready to use in a soap dispenser.

3.4 Sediment and suspended material. The toilet soaps shall be free of sediment or suspended material.

4. Product Conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

ASTM standards are available from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959.
