FEDERAL SPECIFICATION

# HOLDER, NAMEPLATE, DESK, WOOD

*This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.*

## 1. SCOPE AND CLASSIFICATION

1.1 This specification covers wood nameplate holders complete with plastic nameplate cover. The nameplate holders shall be of one type (see fig. 1):

## 2. APPLICABLE DOCUMENTS

2.1 The following specifications and standards, of the issue in effect on the date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein.

*Federal Specifications:*

L–P–504—Plastic Sheet and Film, Cellulose Acetate.

TT–F–336—Filler, Wood, Paste.

TT–L–57—Lacquer, Rubbing, Clear, (For Wood Furniture).

TT–S–190—Sealer, Sanding, Lacquer Type, (For Wood Furniture).

TT–S–720—Stain: Wood, Non-Grain-Raising, Solvent-Dye Type.

PPP–B–636—Box, Fiberboard.

*Federal Standard:*

Fed. Std. No. 123—Marking for Domestic Shipment (Civilian Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Washington, D. C., Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles, and Seattle, Wash.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

*Military Standards:*

MIL–STD–105—Sampling Procedures and Tables for Inspection by Attributes.

MIL–STD–129—Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

## 3. REQUIREMENTS

### 3.1 Materials.

3.1.1 *Wood.* The holder shall be made of hardwood suitable to the manufacturing process and capable of taking an acceptable finish, as specified in 3.4 and 3.5.

3.1.2 *Plastic.* The flexible transparent strip which covers the nameplate shall be plastic conforming to L–P–504, type I.

3.2 **Design and construction.** The holder design and construction shall be in accordance with the details shown in figure 1. All surfaces, except the nameplate slot, shall be sanded smooth. Corners shall be eased, except those at the ends of the nameplate slot. The nameplate slot shall be free of roughness which would hamper insertion of the nameplate and plastic cover.

Check the source to verify that this is the current version before use.

**3.3 Dimensions.**

3.3.1 *Wood holder.* The wood holder shall be of the dimensions delineated by figure 1 with an allowable tolerance of plus or minus 1/16 inch except as otherwise specified.

3.3.2 *Plastic nameplate cover.* The nominal dimensions of the plastic nameplate cover shall be 9-3/8 inches long by 1-5/16 inches wide and 0.040 inch nominal thickness.

**3.4 Color.** The color of the nameplate holder shall match the standard color adopted by the Federal Supply Service, General Services Administration, for walnut office furniture (see 6.4).

**3.5 Finish.** The nameplate holder shall be stained with a nongrain-raising wood stain of a solvent-dye type conforming to TT-S-720. If the material is open grained hardwood, filler conforming to TT-F-336 shall be applied to all surfaces. When the filler has dried to a proper wiping consistency, it shall be worked into the pores so that they are completely filled. Excess filler shall be cleaned from all surfaces, crevices, and corners. The holder shall be given one coat of lacquer type sanding sealer conforming to TT-S-190 and a coat of flat, clear rubbing lacquer conforming to TT-L-57.

**3.6 Workmanship.** The workmanship shall be such as to produce a nameplate holder of good quality. The finished holder shall be smooth and free from runs, cracks, or other defects which would impair appearance or serviceability.

## 4. QUALITY ASSURANCE PROVISIONS

**4.1 Responsibility for inspection.** Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

**4.2 Sampling and inspection for acceptance.** Sampling and inspection for acceptance shall be performed in accordance with MIL-STD-105. For the purposes of sampling, a lot shall consist of all nameplate holders submitted for acceptance at one time.

4.2.1 *Inspection of the end item.* The inspection shall be based on an acceptable quality level (AQL) of 4.0 defects per hundred units and shall be in accordance with the classification of defects listed in table 1. The sample unit shall be one nameplate holder, sampled at inspection level II.

**Table I.** *Inspection for nameplate holder defects*

| Examine | Defects |
|---|---|
| Construction: | Dimensions not as specified. |
| | Not of hardwood. |
| | Plastic nameplate cover missing or defective: Cloudy, does not fit properly, of incorrect size, or with unduly rough edges. |
| Finish and workmanship | Surfaces or edges not smooth. |
| | Corners not eased. |
| | Roughness of nameplate slot. |
| | Cracks, splinters, or sharp projections in wood. |
| | Blemishes or runs in finish. |
| | Color not as specified. |

4.2.2 *Inspection of preparation for delivery.* An inspection shall be made to determine that packaging, packing, and marking comply with the requirements in section 5. Defects shall be scored in accordance with table II. For examination of interior packaging the sample unit shall be one shipping container fully prepared for delivery, select-

ed at random- just prior to the closing operations. Defects of closure listed shall be examined on shipping containers fully prepared for delivery. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be S–4 with an AQL of 6.5 defects per hundred units.

**Table II.** *Inspection for preparation for delivery defects*

| Examine | Defects |
|---|---|
| Markings (exterior and interior) | Omitted; incorrect; illegible; improper size, location, sequence, or method of application. |
| Materials | Any component missing or damaged. |
| Workmanship | Inadequate application of components such as incomplete closure of container flaps, loose strapping, or distortion of container. |

## 5. PREPARATION FOR DELIVERY

**5.1 Packaging.** Packaging shall be level A, B, or C, as specified (see 6.2).

5.1.1 *Level A.*

5.1.1.1 *Unit packaging.* Forty-eight nameplate solders individually furnished in a paperboard sleeve or plastic bag shall be packaged in a close-fitting box conforming to PPP–B–636, class weather-resistant. The box shall be closed in accordance with the appendix to the box specification.

5.1.2 *Level B.* The nameplate holders shall be packaged in accordance with 5.1.1.1, except the PPP–B–636 box shall be class domestic.

5.1.3 *Level C.* The nameplate holders shall be packaged to afford protection against deterioration and damage from the supplier to the initial destination. The supplier may use his commercial practice provided it fulfills the above requirements.

**5.2 Packing.** Packing shall be level A, B, or C, as specified (see 6.2).

5.2.1 *Level A.* Two unit packages of nameplate holders, shall be packed in a close-fitting box conforming to PPP–B–636, class weather-resistant. The box shall be closed, waterproofed and strapped in accordance with the appendix to the box specification.

5.2.2 *Level B.* Two unit packages of nameplate holders shall be packed in a close-fitting box conforming to PPP–B–636, class domestic. The box shall be closed in accordance with the appendix to the box specification.

5.2.3 *Level C.* The nameplate holders shall be packed to insure carrier acceptance and safe delivery at destination at the lowest rates, in containers complying with the rules and regulations applicable to the mode of transportation.

**5.3 Standard packaging (civil agencies).** The standard packaging for civil agencies shall be as specified in 5.1.2 and 5.2.2, respectively.

**5.4 Marking.**

5.4.1 *Civil agencies.* In addition to markings required by the contract or order, the interior packages and shipping containers shall be marked in accordance with Fed. Std. No. 123.

5.4.2 *Military activities.* In addition to markings required by the contract or order, the interior packages and shipping container shall be marked in accordance with MIL–STD–129.

## 6. NOTES

**6.1 Intended use.** Nameplate holders are intended for desk top use to position embossed paperboard nameplates for ready visibility.

**6.2 Ordering data.** Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(*a*) Title, number, and date of this specification.

(*b*) Selection of application levels of packaging, packing, and any special marking required (see 5.1, 5.2, and 5.4).

Check the source to verify that this is the current version before use.

**6.3 Standard pack for civil agencies.** The standard pack requirements in 5.3 are intended for use in procurements of stores stock replenishments. Procuring officers should use the standard pack requirements when it is known that the material will be shipped from a supplier to a domestic warehouse, supply depot or intermediate storage point for temporary storage, subsequent issue or shipment to eventual user.

6.4 Sample panels of the standard colors of finish are obtainable, without charge, from the Business Service Center, Federal Supply Service, General Services Administration, Regional Office Building, Washington, D. C., 20407, or from the Business Service Center of the nearest General Services Administration Regional Office (see 3.4).
