Add the following new paragraph:

"4.6.7 Supplementary wax coating weight test. The sample links shall be tested by weighing the links together to the nearest milligram. The supplementary wax coating shall then be completely removed from the links by trichloroethylene vapor degreasing, and the links dried and reweighed. The difference between the total weights before and after removal of the supplementary wax coating divided by the number of links tested shall be considered as the weight of the supplementary wax coating of each link."

The margins of this amendment are marked with an asterisk to indicate where changes (additions, modifications, corrections, or deletions) from the previous amendment were made. This was done as a convenience only and the government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationshiop to the previous amendment.
